MONSTERS A TO Z

THE SECOND compendium of monsters for the DUNGEONS & DRAGONS® game, *Monster Manual*® 2 is filled with a new assortment of creatures designed to challenge and terrify adventurers of all levels.

The monsters in these pages offer threats of every level and include brand new monsters, such as firbolgs and djinns, as well as new versions of familiar monsters like giants and demons. *Monster Manual 2* also introduces the metallic dragons, which join their chromatic kin in the game.

The rest of this introduction explains how to read a monster's statistics block and assumes you're familiar with the power and combat rules in the *Player's Handbook*®. The glossary, starting on page 216, defines many of the terms used in the book, and the list of monsters by level, starting on page 221, is meant to assist you in tailoring encounters for your player characters (PCs).

THE STATISTICS BLOCK

A monster's statistics are presented in a format meant to be used in play. A typical statistics block is formatted as follows.

Monster Name	Level and Role
Size, origin, and type (keywords)	XP value
Initiative modifier Senses Perception modifier; special senses	
Aura name (keywords) aura size; effect.	
HP maximum; Bloodied value	
Regeneration	
AC; Fortitude, Reflex, Will	
Immune effects; Resist effects; Vulnerable effects	
Saving Throws modifier

Con score (modifier) Int score (modifier) Cha score (modifier)	
Equipment armor, shield, weapons, other equipment	

LEVEL AND ROLE

A monster's level and role are tools for the DM to use when building an encounter. Chapter 4 of the *Dungeon Master's Guide* explains how to use these tools.

Level: A monster's level summarizes how tough it is in an encounter. Level determines most of the monster's statistics as well as the experience point (XP) award the PCs earn for defeating it (*Dungeon Master's Guide*, pages 56–57).

Role: A monster's role describes its preferred combat tactics, much as a character class's role suggests tactics for PCs. Monster roles are artillery, brute, controller, lurker, skirmisher, and soldier (*Dungeon Master's Guide*, pages 54–55).

A monster might have a second role: elite, solo, or minion. Elite monsters and solo monsters are tougher than standard monsters, and minions are weaker. For the purpose of encounter building, an elite monster counts as two standard monsters of its level, a solo monster counts as five, and four minions count as one.

In addition, a monster might have the leader sub-role, indicating that it grants some sort of boon to its allies, such as a beneficial aura.

SIZE

A creature's size determines its space as well as its reach.

Monster Size	Space	Reach
Tiny	1/2 × 1/2	0
Small	1 × 1	1
Medium	1 × 1	1
Large	2 × 2	1 or 2
Huge	3 × 3	2 or 3
Gargantuan	4 × 4 or larger	3 or 4

Space: This is the area (measured in squares) that a creature occupies on the battle grid.

Reach: If a creature's reach is greater than 1, the reach is noted in any melee power the creature has that uses that reach. Even if a creature's reach is greater than 1, the creature can't make opportunity attacks against targets that aren't adjacent to it unless it has threatening reach.

A creature that has reach 0 cannot normally make melee attacks outside its own space.

ORIGIN

A monster's origin summarizes its place in the D&D cosmology. Origins are aberrant, elemental, fey, immortal, natural, and shadow. See the glossary for information about each origin.

TYPE

A creature's type summarizes some basic things about its appearance and behavior. Types are animate, beast, humanoid, and magical beast. See the glossary for information about each type.

KEYWORDS

Some monsters have keywords that further define them. These keywords represent groups of monsters, such as angel, demon, devil, dragon, and undead. See the glossary for definitions of a monster's keywords.

SENSES

Every monster has a Perception modifier. Some monsters also have special senses, such as darkvision or tremorsense, which are noted in the "Senses" entry.

AURA

If a monster has an aura, that is noted near the top of its statistics block. An aura is a continuous effect that emanates from the monster. See the glossary for more about auras.

REGENERATION

Some monsters have regeneration. At the start of each of its turns, a monster that has regeneration regains a specific number of hit points, as long as the monster has at least 1 hit point.

The regeneration of some monsters can be suppressed by certain types of damage or by specific circumstances, and some creatures can use regeneration only under specific circumstances (for example, only while bloodied).

SPEED

If a monster has alternative movement modes, such as fly, climb, or swim, that fact is noted in its speed entry.

ACTION POINTS

Elite and solo monsters have action points they can spend to take extra actions, just as PCs do. Unlike PCs, a monster can spend more than 1 action point in an encounter, but only 1 per round.

POWERS

A monster's powers are presented so that its basic attacks appear first, followed by its other powers.

TYPE

Each power has an icon that represents its type: melee (♣), ranged (♠), close (♠), or area (♣). If a power doesn't have an icon, it's a personal power.

A basic attack has a circle around its icon: melee basic attack ⊕ or ranged basic attack ⊗.

ACTION

If a power requires an action to use, that fact is noted in the power's description. An immediate action's trigger is noted right after the action type. Some powers don't require an action to use; they simply occur in response to a trigger.

REQUIREMENT

Some powers are usable only if a precondition is met. For example, a power might be usable only while a monster is bloodied or only if it is wielding a specific weapon. A requirement is noted after a power's action type, if any.

RECHARGE

A monster power is at-will, encounter, or daily, or it recharges in certain circumstances.

Recharge ⊠ ⊡ ⊢ ⊣ ⊤: The power has a random chance of recharging during each round of combat. At the start of each of the monster's turns, roll a d6. If the roll is one of the die results shown in the power description, the monster regains the use of that power. The power also recharges after a short rest.

Recharges when . . .: The power recharges in a specific circumstance, such as when the monster is first bloodied during an encounter. The power also recharges after a short rest.

RANGE AND AREA

A melee power has a range of 1, unless otherwise noted. Ranged powers specify a range, and area powers and close powers specify a range and an area of effect.

TARGETS

Some monster powers specify targets. An area attack or a close attack targets each creature within its area of effect, unless otherwise noted.

ATTACK

Unless an attack power hits automatically, its description includes an attack notation, which specifies the monster's attack bonus for that power and which defense it targets.

Hit: The effect of a power hitting is specified after the attack notation.

Miss: Some attack powers have an effect on a miss (indicated by *Miss*).

Effect: Some attack powers have an effect whether or not the attack hits (indicated by *Effect*).

EFFECTS

Monster powers include many of the same effects that appear in PC powers, such as aftereffects, conditions, damage of various types, ongoing damage, and secondary attacks.

A power's effects are instantaneous, unless otherwise noted. The effects of some powers can be sustained (indicated by *Sustain* and then whatever action is required to sustain the effect).

ALIGNMENT

A monster's most typical alignment is noted in its statistics block. Chapter 2 of the *Player's Handbook* contains information on the various alignments.

LANGUAGES

A statistics block gives the languages that a monster typically can speak and understand. An individual monster might know additional languages, like Common or the languages of its companions. See the *Dungeon Master's Guide*, page 171, for more information about the languages of the D&D world.

SKILLS

The skills section of a monster's statistics block includes only trained skills or skills for which the monster has an unusual modifier. A monster's Perception modifier isn't repeated here.

ABILITY SCORES

A monster's six ability scores are included toward the bottom of its statistics block. Following each score in parentheses is the adjusted ability score modifier, including one-half the monster's level, which is useful whenever the monster needs to make an untrained skill check or an ability check.

EQUIPMENT

A monster's "Equipment" entry notes the weapons and implements the creature uses. If a character gains a monster's equipment, he or she can use it as normal equipment. A character does not gain the powers that a monster uses through its equipment.

HEALING SURGES

Monsters have healing surges. However, few monsters have powers that let them spend healing surges. The number of healing surges a monster has is based on its level: 1–10, one healing surge; 11–20, two healing surges; 21 or higher, three healing surges.

Because they rarely come into play, healing surges are not included in a monster's statistics block.

ANGEL

ANGELS ARE DIVINE SERVANTS OF THE GODS. Although common in the Astral Sea, they can be found anywhere acting on behalf of a deity or other force whose goals align with their calling.

ANGEL OF AUTHORITY

AN ANGEL OF AUTHORITY IS THE MOUTHPIECE of a deity. This angel governs other angels and servants of a deity in and out of combat.

ANGEL OF RETRIEVAL TACTICS

An angel of retrieval is often dispatched to capture a person or a thing. The angel uses *hunt the guilty* on the individual to be captured or the one holding an item to be recovered. The angel uses *clear the way* to give its allies more space to maneuver. Otherwise, the angel prefers to fight from a distance with its *angelic bow*.

(Left to right) angel of authority, angel of light, and angel of supremacy

ANGEL OF RETRIEVAL LORE

Religion DC 24: An angel of retrieval is best described as a bounty hunter from the Astral Sea. These angels are trained in rituals that allow them to hunt down creatures, such as *Observe Creature* (*Player's Handbook*, page 309) and *Planar Portal* (*Player's Handbook*, page 311).

ENCOUNTER GROUPS

An angel of retrieval is assisted by other angels in interplanar hunting parties.

ANGEL OF LIGHT TACTICS

A squad of angels of light spreads out and tries to attack as many targets as possible. They never retreat from battle.

ANGEL OF LIGHT LORE

Religion DC 24: An angel of light is the bound form of a deity's subconscious thoughts, appearing in the Astral Sea as a mote of pure energy until given direction by more powerful angels. The thought that originally formed it drives its actions eternally.

Religion DC 29: Although directed by a deity's thoughts, angels of light can act independently to see those thoughts enacted. There have even been rare occasions when angels of light acted in ways contrary to their creators' ethos in zealous attempts to see those ideas made real.

ENCOUNTER GROUPS

Angels of light are found with other angels or as members of a larger group enforcing a deity's will.

- ◆ 3 angels of supremacy (level 24 soldier)
- ◆ 1 deva fallen star (level 26 artillery)
- ◆ 1 tormenting ghost (level 21 controller, MM 117)

ARCHANGEL

The highest of all angels are the Archangels, powerful beings from the Astral Sea. An archangel is the ultimate authority in an astral dominion with the exception of the actual deity.

The archangel template can be applied to any angel.

Archangel	Elite Controller
(angel)	XP Elite
Saving Throws +2	
Action Point 1	
Hit Points +8 per level + Constitution score

Nature DC 17: Giant ants communicate with nearby members of the hive by using a complex combination of pheromones. These pheromones are highly acidic, and the ants use them to damage foes.

The few archons that are independent prowl the Elemental Chaos, attacking creatures without elemental origins.

EARTH ARCHON LORE

Arcana DC 13: Earth archons prefer a slow, inexorable advance toward conquest, and they are excellent strategists. They prefer to take, hold, and fortify positions, unlike the rapid and destructive blazes of fire archons. In this regard earth archons are similar to ice archons and work well with them.

Arcana DC 20: The greatest fortress of earth archons in the Elemental Chaos is Thrak-Harda, ruled by a stone titan named King Brakkamul. This sprawling fortification guards a huge gem called the Diamond of Despair.

Arcana DC 25: Rumors say that the fortifications around the Diamond of Despair are intended to protect others from it rather than to protect it from thieves. What danger it presents is a matter of speculation, and the Diamond has long been an obsession of the dao, mysterious cousins of the djinns and efreet.

WATER ARCHON WAVESHAPER TACTICS

A wavershaper is content to linger at the edge of battle, just within the limits of its ranged powers. From this location, the wavershaper alternates between using *dizzying whirlpool* and *geyser*, using the first while the second recharges. A wavershaper uses *ocean call* early in combat, once its allies have engaged their enemies.

WATER ARCHON LORE

Arcana DC 18: Water archons don't limit themselves to seas. They use rivers and streams as highways, setting up outposts in swamps or lakes. Water archons prefer to remain near water, but use land-based attacks as a surprise tactic.

Arcana DC 23: Water archons prowl waterways in great ships of water crafted by wavershapers. These strange aquatic masses have a semisolid state that allows them to rise and submerge as the water archons wish. These ships have given water archons a reputation as planar pirates.

ENCOUNTER GROUPS

Water archons typically find themselves in the service of masters as mercurial and destructive as the sea itself. They are loyal as long as they are not sent too far from water and are given frequent opportunities to spread misery and woe.

BEHIR

THE BEHIR IS A MULTILEGGED SERPENTINE HORROR known for its fearsome lightning-spitting attack. Clever and voracious predators, behirs are deadly hunters from the time they are hatched.

BEHIR

SHREWD AND DEADLY, a behir is capable of running down prey and swallowing it whole. A quick-witted opponent could try to reason with—or bribe—a behir before becoming its next meal.

BEHIR STORMSTEED TACTICS

BEHIR LORE

Nature DC 11: A behir is a cunning predator that spends its life apart from others of its kind. Behirs eject their young from their lairs shortly after birth, forcing them to fight to survive.

Nature DC 18: Despite its bestial nature, a behir is surprisingly intelligent. By virtue of their ability to speak and understand Common, behirs are sought out by creatures looking to entice one of these predators into their service. Such negotiations end badly if the behir's terms are not met.

Nature DC 23: Stormsteeds can ride the lightning they generate, allowing them to fly through the air and even hover. They are allies and mounts of storm giants.

Dungeoneering DC 12: Though less powerful than its other beholder kin, a gauth possesses deadly eye rays and a hunger for power.

Dungeoneering DC 17: A gauth is a cowardly creature that relies on allies and slaves for protection. It is perfectly willing to sacrifice those allies to save its own life.

The eye of chaos targets a random creature with its *central eye* each round while targeting another creature with one of its *eye rays*. When bloodied, it uses *ripple of chaos* to attack the closest targets, then teleports to an easily defended location.

EYE OF CHAOS LORE

Dungeoneering DC 26: Eyes of chaos are associated with demons and other creatures of the Elemental Chaos, although they ally themselves with any creature if doing so advances their ruinous goals. Like a demon, an eye of chaos seeks to sow destruction and discord, but its plans are far more complex.

Dungeoneering DC 31: Eyes of chaos arose from an ancient beholder eye tyrant that sought to tap the power of the shard of pure evil that created the Abyss. Although it never found the shard, this eye tyrant returned from the Abyss possessed of great power that warped it physically and mentally. None can say what secret goals drive the eyes of chaos, but their actions more often align with the interests of demons than with those of other beholders.

The ultimate tyrant focuses its *central eye* attacks on the strongest-looking melee combatants, hoping to keep them out of the fray. However, it stays near enemies in order to maximize the effect of its *spasmodic rays*.

BULLYWUG

NASTY AND NOISOME, bullywugs turn any swamp they inhabit into a dismal echo of the land it once was, so much so that even they view their existence as innately askew. Bullywugs sense this “wrongness” as a heightened paranoia, a feeling that everyone is out to kill them. And it’s true—creatures that attack a bullywug with extreme power or precision find themselves blessed by a moment of clarity and renewed strength, as if the natural world were thanking them.

CENTAUR LORE

Nature DC 10: Centaurs are wild folk with a love of battle so powerful that they sell their combat services to other creatures, especially fey. Highly territorial, centaurs brook no trespass and challenge those who enter their lands. Their homes commonly include stretches of awe-inspiring steppes in the Feywild, bordered by rough hills or mountains. Worldly plains, particularly near elven lands, might also support a tribe of centaurs.

Centaurs build their villages among hills near water and in natural caves. They do so for protection and a good view of surrounding territory. Peaceful visitors to such settlements do well to loudly announce themselves and bring friendship offerings of food and strong drink, a common centaur custom.

(Left to right) centaur hunter, ravager, and mystic

Nature DC 16: Centaurs revere the wild forces represented by Kord and Melora, rather than those of the fey god Corellon. Thus, they love the wild, and they fiercely protect pure lands from despoiling interlopers and monsters. They see combat and athletic contests as paths to renown, and they do not fear death in battle. Their celebrations after successful battles, hunts, or births are unruly and long, full of boasting, sport, and drink.

As fierce as they are, centaurs are gentle to one another and to friends. They have a strong mystical tradition and wise leaders, most of which are female. Their laws are simple and very different from human standards. The punishment for serious crimes is banishment from the tribe. Such outlaws must leave the tribe's lands, and no other tribe member can raise hand or hoof to help them.

Nature DC 21: Devotion to Kord's creed and a spiritual connection to nature is physically manifest in these fey creatures; mystics among the centaurs develop amazing powers over the natural world. Centaurs devoted to battle, as well as centaur mages, develop power over lightning and thunder.

ENCOUNTER GROUPS

Centaurs have strong ties with elves, eladrin, gnomes, and satyrs. Many adventurous centaurs live among other fey and explore the wider cosmos. Fey chargers, for example, have been seen as "knights" in eladrin courts. Exiled centaurs do the same, although these outcasts are more likely to be evil. A few centaurs, often campaigners, venture far afield as mercenaries.

CHAOS SHARD LORE

Arcana DC 10: Chaos shards are sentient crystal creatures formed in the maelstrom where the deepest levels of the Elemental Chaos become the Abyss.

Arcana DC 16: Chaos shards exist due to the influence of the shard of pure evil from which the Abyss was created. Legends state that the most powerful of the chaos shards are splinters of this legendary crystalline fragment.

Arcana DC 21: Wizards and those that draw power from the Elemental Chaos sometimes capture chaos shards to use them as sources of power.

ENCOUNTER GROUPS

Chaos shards travel together in small clusters, sowing upheaval wherever they go. They are also highly sought after by arcane casters and creatures of the Elemental Chaos, which use them as powerful (if unpredictable) guardians.

Level 7 Encounter (XP 1,500)

COCKATRICE TACTICS

Despite its fearsome reputation, a cockatrice is a cowardly foe. It engages one enemy at a time, using its *buffeting wings* to bite and then retreat.

COCKATRICE LORE

Nature DC 12: The lair of a cockatrice is filled with broken statues of previous victims, which include various wild animals. In the wild, the soft ground of a cockatrice's lair is filled with short tunnels and hollows that a cockatrice can use when attacked.

Nature DC 17: Feathers freshly plucked from a cockatrice can be mixed with mud to create a poultice that reverses petrification when spread over an affected creature. This method requires a DC 20 Heal check and 30 minutes, and it is successful only if the poultice is applied within twenty-four hours of the petrification. One cockatrice provides enough feathers to create a poultice for one petrified creature.

ENCOUNTER GROUPS

Reptilian and serpentine monsters such as yuan-ti, lizardfolk, and medusas sometimes keep cockatrices as pets or guardians.

COUATL LORE

Religion DC 11: Couatls are benevolent celestial serpents known for their hatred of demons and other forces of evil and chaos.

Religion DC 18: The couatls' benevolent reputation is only partly deserved. Although they are driven in their hatred of evil, couatls are single-minded in their dedication to their specific plans, whether protecting a village, propelling a chosen creature on a path of destiny, or preventing a planar breach. Creatures that stand opposed to a couatl's plans—knowingly or otherwise—can easily find themselves the object of the creature's wrath.

Religion DC 23: Couatls were supposedly born of the first light in the world. Ancient lore speaks of great couatls fighting in the war between the gods and the primordials, and of how these creatures bound mighty beings within the world or on other planes. Free couatls and their followers work to make sure such sites remain forever undisturbed.

ENCOUNTER GROUPS

Couatls most often ally with other creatures that share a desire to oppose malevolence or guard against ancient evil. However, a couatl might fight on the side of unaligned or even evil creatures if doing so works against a greater evil in the long term.

CROSSING BETWEEN WORLDS

A couatl can cross from any plane to the Astral Sea by taking 10 minutes to do so. It arrives at a random location or at a teleportation circle it knows. If it chooses to, it can make an Arcana check to leave a portal open behind it. Such a portal's duration is the same as if the couatl had created it using the Planar Portal ritual (PH 311).

DEMOGORGON

DEMOGORGON, PRINCE OF DEMONS, is a two-headed monstrosity who commands the fear and respect of deities, devils, demons, and primordials alike. His followers embrace wanton destruction, and his wars against Orcus and Graz'zt have raged across the Abyss for eons. Only Demogorgon's two competing minds keep his mad ambitions in check.

The Prince of Demons is cunning, cruel, envious, and ferocious even for a demon. He sees both sides of every problem and has plenty of attention to spare for his cosmos-spanning cult of sadism and destruction.

Demogorgon's worshipers include troglodytes, kuo-toa, and other humanoids that exult in mindless violence and destruction. In times of chaos, humans and others flock to Demogorgon's cult. Demogorgon's priests teach that through savagery, strength, and slaughter, followers thrive and multiply where others fade and die. When war wracks the land—particularly when hordes of monsters sweep over bastions of civilization, leaving them in ruin—Demogorgon's cult grows strong.

Although Demogorgon's cult is small, it leaves a terrible swath of destruction across the land. Demogorgon's cultists organize themselves into crude war bands, relying on battle madness and wrath to overpower their enemies. They wander from town to town, burning and looting everything in their paths. Like miniature aspects of their lord's wrath, they destroy all they see.

No commentary on Demogorgon is complete without mention of Dagon, a mighty demon lord who prowls the deepest waters of the Abyss. If Demogorgon is the machine of destruction, Dagon is the cool, calculating mind behind it, sowing chaos in subtle, intricate ways. Dagon, Lord of the Depths, is an oracle and sage among demons. Creatures of the Abyss, and those brave or foolish enough to seek his counsel, offer him powerful artifacts and favors in return for shares of his knowledge.

The rough alliance between Dagon's intellect and Demogorgon's brute strength makes their combined power formidable. Dagon whispers his knowledge into each of Demogorgon's heads—never both at the same time—thus playing a significant role in the tension between Demogorgon's two minds.

DEMOGORGON TACTICS

Demogorgon attempts to divide and conquer his enemies. He uses *inescapable grasp* to pull individuals toward him, rips into his chosen targets with his tentacle attack, and uses *Aameul's gaze* and *Hethradiah's gaze* to keep other enemies at bay. If sorely pressed, Demogorgon teleports away.

Demogorgon has a full set of actions on each of these turns, and Demogorgon's ability to take an immediate action refreshes on each turn. Each of Demogorgon's heads is unable to use the attack power named for the other head.

DEMOGORGON LORE

Arcana DC 22: Demogorgon's two heads are named Aameul and Hethradiah. Aameul prefers deception, and Hethradiah favors destruction. Originally, Demogorgon had one head and one mind. A mighty blow from the deity Amoth split him nearly in two before Demogorgon killed Amoth. After he healed, Demogorgon's head remained split. The two heads often disagree with one another but turn disagreement to their mutual advantage. For instance, one head struck an alliance with a powerful lich queen of the deep Shadowfell, and the other killed her to steal her powers.

Arcana DC 32: As comfortable in the seas as on the land, Demogorgon makes his home in a tropical region of the Abyss that is composed of dense jungles, deep oceans, and vast stretches of brine flats. The mightiest of the demon princes, Demogorgon commands creatures from places as varied as the depths of the Underdark and the decadent palaces of civilization. Troglodytes worship him as a deity, sparking endless battles against their Torog-worshipping kin. Colonies of kuo-toas appeal to him for aid in reclaiming their once-great empire.

Arcana DC 37: Twins born to cultists or kidnapped and indoctrinated at a young age lead Demogorgon's mightiest cults. Each twin serves one of Demogorgon's two personalities. Invariably, such a cult falls to infighting as one high priest turns against the other, hindering many a foul plot.

Arcana DC 39: Temples to Demogorgon often reflect the dual nature of the Prince of Demons. Builders construct each temple symmetrically: One half is dedicated to Aameul, and the other to Hethradiah. Priests, warriors, petitioners, and other functionaries dwell in whichever side of the temple better fits their personalities. A grand cathedral unites the two halves at the center.

ASPECT OF DEMOGORGON

THE RITUAL FOR SUMMONING AN ASPECT of Demogorgon—a manifestation of Demogorgon's form and powers that is less potent than the Prince of Demons—involves “twinning” to represent Demogorgon's two personalities. A cultist might split a sacrifice in half down the center.

An aspect of Demogorgon acts more like one of the demon's heads than the other, being an unbalanced version of the demon. The aspect behaves like Demogorgon but does not commune with either of Demogorgon's minds. It melts into a puddle of venom when it completes the task for which it was summoned.

ASPECT OF DEMOGORGON TACTICS

An aspect of Demogorgon uses tactics similar to those of the true demon lord. Lacking gaze attacks, it instead uses *dominating glare* to turn several enemies into allies and then focuses subsequent attacks on those who avoid the effect.

ASPECT OF DEMOGORGON LORE

Arcana DC 26: The dark ritual to summon Demogorgon requires a sacrifice of life. Only the most faithful—thus, the most demented—of his followers can successfully complete the ceremony.

Arcana DC 31: Mortals cannot summon Demogorgon, but an aspect of him answers the ritual's call. A temporary manifestation of power, the aspect has no psychic or spiritual connection to the demon lord.

DAGON

DAGON WAS THE FIRST DEMON LORD to appear in the Abyss. None can say whether the Chained God created the Abyss or opened the first passage to its depths. When the first primordials entered the Abyss, they found Dagon already lurking deep within its dark seas and hidden recesses.

DAGON TACTICS

Dagon draws his enemies near in battle, particularly warlocks, clerics, and other spellcasters who avoid close fighting. Dozens of clawed tentacles constrict and tear unlucky captives to pieces. A calculating tactician, Dagon uses *wrath of the deep* to turn the area within 5 squares of him into a killing zone. Dagon uses *doom drone* and *abyssal tides* to keep his enemies within that area.

DEMOGORGON

DAGON LORE

Arcana DC 20: Dagon, the oldest of the demon lords, possesses a treasure trove of lost secrets and blasphemous knowledge. He allied with Demogorgon soon after the Abyss formed, and since then the two demon princes have fought Orcus and Graz'zt for domination. Although Dagon sends fewer demons and followers into these battles than Demogorgon does, his knowledge of the Abyss and his keen mind allow their combined minion forces to outmaneuver their enemies.

Arcana DC 30: Dagon's cultists reside in isolated seaside towns and villages. He can call up storms and tidal waves to punish those who defy him and send great schools of fish to those who offer sacrifices to him. Villages prone to the cult descend into savagery, because Dagon demands greater and greater sacrifices of intelligent humanoids in return for his favors.

Arcana DC 35: Wizards and sages willing to trade their sanity for arcane lore seek Dagon's counsel. Arcane casters lead many of his cults. Shadow wars between clerics of Vecna and followers of Dagon are common.

Arcana DC 37: Dagon's temples are underwater, although they include air-filled chambers and caverns for his terrestrial followers. Powerful currents sweep petitioners through water-filled tunnels and deposit them in deep sea caves to allow them access to Dagon's temples.

ANDREW HITCH

KAZUUL, EXARCH OF DEMOGORGON

AS A CHAMPION OF GOOD who served Erathis, Kazuul carved a swath of order through savage lands. In time, though, Kazuul came to embrace destruction. He became a manifestation of the forces of chaos and carnage and joined Demogorgon's faithful. Kazuul turned his back on humanity entirely and accepted an investiture of demonic size and strength from the demon lord. Now an exarch of Demogorgon, he fights for Hethradiah, the aspect of Demogorgon dedicated to savagery.

Twice the size of a mortal human, Kazuul has a heavily armored body deformed by demonic musculature. Wielding a sword and an axe, he stalks the battlefields of the Abyss and beyond, herding an army of demons before him and leaving desolation and gore in his wake.

KAZUUL TACTICS

Kazuul throws himself into the fray like a madman, shrieking a battle cry and launching himself at the nearest enemy. Only the sight of a powerful magic weapon can lure him from his battle madness. If one of Kazuul's enemies uses a 28th-level or higher magic weapon, he focuses all his attacks on that enemy.

Kazuul once owned the mighty blade Gorgorin the Shatterer but lost it in battle against Hainard, exarch of Pelor and leader of that deity's White Guard. Kazuul burns with desire to find a worthy replacement or to recover Gorgorin.

KAZUUL LORE

Arcana DC 28: Kazuul bears two weapons taken from exarchs. One, the Tooth of Grom, is a longsword forged from the tooth of a slain fire titan lord. Kazuul claimed the other weapon, a battleaxe called World Splitter, from Clangeddin Silverbeard, who still harbors a grudge for its loss.

In battle, Kazuul seeks out the enemy who bears the mightiest weapon. He loves nothing more than pulling such armaments from his enemies' shattered corpses.

Arcana DC 33: An ancient prophecy uncovered by the eladrin sage Ellannia proclaims that when Kazuul reclaims the sword Gorgorin, he will use it to slay Demogorgon and will then displace Yeenoghu as lord of the gnolls. The prophecy has spawned infighting and attempts to wrest it from its hiding places in the Feywild and in the world.

THRARAK, EXARCH OF DEMOGORGON

DEMOGORGON'S CLAIM to the title "Prince of Demons" has long been disputed, but no being has defeated him to claim that name. He has fought dozens of would-be conquerors, both fellow demon lords and primordials eager to regain their lost might. One such enemy was Storralk, a primordial of stone and earth that fell upon Demogorgon soon after Demogorgon's battle with Amoth split Demogorgon's head in two.

Storralk, failing to recognize Demogorgon's rise to power, foolishly challenged the demon lord to a battle. The shock waves of that cataclysmic battle were felt in the depths of the Abyss and across the Astral Sea.

Demogorgon tore his enemy to pieces. So great was Demogorgon's wrath that he used a powerful ritual given to him by Dagon to extend Storralk's agony. With that ritual, he called forth ettins from the blood Storralk spilled that day. Each ettin carries with it a small shard of Storralk. Every time an ettin feels pain, Storralk's quivering, flayed corpse writhes with agony in his tomb beneath Demogorgon's throne.

Thrarak was one of the first ettins. She remained in Demogorgon's lair, currying favor at first by alternately tending to Storralk's wounds and sawing through the whimpering primordial's flesh. Today, she is the Flayed Maiden, a two-headed agent of vengeance dispatched by Aameul to visit agony upon Demogorgon's hated enemies. She breaks her enemies' minds and bodies, leaving their gibbering husks as a warning to those who would dare cross the Prince of Demons.

THRARAK TACTICS

As the exarch of Aameul, the head of Demogorgon that uses deception to destroy its enemies, Thrarak fights using a seemingly random strategy. She shrieks strange oaths and curses containing cryptic riddles, cosmic truths, and forgotten lore.

If on a mission for Demogorgon, Thrarak pursues her designated target with relentless fury. She forgoes attacking so that she can move close to her enemy, even at the risk of taking opportunity attacks. If not on a mission for Demogorgon, she selects an enemy at random and focuses all her attacks on that enemy, despite any attempts by other enemies to distract her.

THRARAK LORE

Arcana DC 26: Thrarak seeks out those among Demogorgon's enemies who have the potential to become threats, such as adventurers beginning on their paths of destiny. She hunts them across the planes, killing them before they can challenge the Prince of Demons.

Arcana DC 31: According to legend, Thrarak possesses the key to freeing Storralk, the primordial of earth and stone trapped beneath Demogorgon's throne. If Thrarak is slain and her heart burned upon Demogorgon's throne, Storralk will break free of the endless torment he has suffered in Demogorgon's realm. In a battle against Demogorgon, the primordial could prove a powerful ally.

ABYSSAL MARAUDER

DEMOGORGON'S ABYSSAL MARAUDERS swoop upon isolated villages and towns, slaughtering inhabitants, carrying off treasure, and burning buildings to the ground. Marauders roam land and sea. On land, they travel in loose war bands. Seaborne marauders use poorly maintained ships that they barely know how to handle. Pirate captains recruit marauders as shock troops, though only a powerful sea prince—or one who supplies plenty of loot and rum—can keep them in check between battles.

ABYSSAL MARAUDER LORE

Arcana DC 12: Selfish and wrathful, abyssal marauders pledge themselves to Demogorgon and adopt his savagery, becoming his thralls.

Arcana DC 17: Abyssal marauders roam land and sea. On land, they travel in war bands. On the sea, they inexpertly sail ramshackle ships from town to town. Pirate captains recruit marauders to aid in maritime battles, luring them with promises of loot and mayhem.

BERSERKER PRELATE OF DEMOGORGON TACTICS

Berserker prelates of Demogorgon lead the faithful into battle, fighting at the front. Other demon worshipers might prefer to sacrifice their followers to preserve their own lives, but Demogorgon's prelates exult in destruction.

At the start of a fight, a prelate uses its *abyssal bolt* attack to force enemies apart. *Bloodletter's call* bogs enemies down and improves the cult's attacks. Once bloodied, the prelate wades amid enemies and uses *death fury*, committing, at that point, to victory or death in Demogorgon's name.

BERSERKER PRELATE OF DEMOGORGON LORE

Nature DC 14: Berserker prelates of Demogorgon are mad prophets that lapse into trancelike states, babble about visions, and make pronouncements. They lead cults of Demogorgon or act as spiritual mascots.

SHRIEKING CULTIST OF DEMOGORGON TACTICS

Demogorgon's shrieking cultists fight with the vengeful fury of the damned. As part of their indoctrination, they embrace nihilistic violence and rage. In battle, they shriek like wild animals with *howl of fury* and hack at their nearest enemies with greataxes and *death wrath*.

SHRIEKING CULTIST OF DEMOGORGON LORE

Nature DC 14: Shrieking cultists of Demogorgon give themselves over to the savage rage of Hethradiah, one of Demogorgon's heads. They howl like maniacs in battle and paint themselves in blood.

Nature DC 19: Shrieking cultists yell and scream incoherently, but when many of them gather, anyone already on the path to madness might sense a demonic song buried in the cacophony.

DEMON

DEMONS ARE AMONG THE OLDEST CREATURES in the universe. At the birth of the Abyss—the profane and terrifying realm in which demons dwell—only a few demons existed. These demon princes were weapons of unfettered destruction, intended for no other purpose than to bring the universe under the heel of the Chained God. As the Abyss grew, its evil spread into other elemental creatures, creating demons of infinite variety and dreadful power. Demons are scourges of the universe, antagonists of creation and order.

Str 26 (+21)	Dex 25 (+20)	Wis 25 (+20)
Con 29 (+22)	Int 20 (+18)	Cha 32 (+24)

ABYSSAL ROTFIEND TACTICS

The abyssal rotfiend unleashes *floating despair*, moving the zone around the battlefield to affect as many enemies as possible. It uses its aura and *conjure abscess* on creatures inside its *floating despair* zone, hindering their escape. The rotfiend relishes inflicting pain on as many targets as possible, and so it prefers to attack uninjured or unbloodied targets over those that are bloodied or injured.

ABYSSAL ROTFIEND LORE

Arcana DC 26: Abyssal rotfiends are demonic undead contained by demon and devil flesh. The spirit within a rotfiend is often a demon soul, although it can come from any evil creature.

Arcana DC 31: Orcus chains abyssal rotfiends in the halls of Everlost, using them as guardians against intruders that can teleport.

ENCOUNTER GROUPS

The abyssal rotfiend favors demonic allies that are maneuverable enough to get between it and dangerous adversaries.

A bebilith moves around constantly during combat, slowing foes with the burning strands of its *flaming web*.

BEBILITH LORE

Arcana DC 20: Bebiliths often serve Lolth, but their limited intellect makes them poor participants in drow schemes. Drow summon these demons as engines of destruction or entrap them for use as guardians.

ENCOUNTER GROUPS

Lolth is fond of bebiliths, so they're often found among drow and other denizens of the Demonweb Pits.

BLOODSEEP DEMON LORE

Arcana DC 14: Bloodseep demons like to weaken their foes before facing them in combat, such as by tainting enemy food sources.

ENCOUNTER GROUPS

DRETCH TACTICS

Dretches attack as a gang to combine their *sickening miasma* auras. Although they are incapable of inventing any other tactics, they can be effectively directed by a leader.

DRETCH LORE

Arcana DC 10: Quarrelsome and stupid, dretches can be tricked into fighting one another if no leader is present.

ENCOUNTER GROUPS

Demons of greater power and intelligence often use dretches as the first wave of an attack, both to see what their enemies are capable of and for the sheer amusement of watching the dretches meet their doom.

GNAW DEMON TACTICS

Slow and clumsy, gnaw demons keep to the edge of the battlefield until an enemy becomes bloodied. Then they use *hungry teleport* to close with that enemy and attack it.

GNAW DEMON LORE

Arcana DC 12: Gnaw demons are cowardly demons that usually choose escape over destruction. Fleeing gnaw demons can become distracted by a weak target, so chasing them down is often as simple as locating their next likely victim.

KAZRITH TACTICS

The kazrith lurks underground and uses tremorsense to locate its enemies. Once it has chosen a target, it surfaces and attacks, using *acidic retreat* after the attack. It waits for the acid to run its course and then resurfaces to finish off the victim.

KAZRITH LORE

Arcana DC 22: Kazrith demons are water-dwelling predators of the planes. They lurk in lakes, rivers, and waterways, waiting for unwary prey to pass by. Kazriths can also burrow. Acid sprays from a kazrith's pores, aiding the demon's ability to burrow and leaving a fountain of acid in its wake.

ENCOUNTER GROUPS

Gnaw demons work on the promise of food.

NEEDLE DEMONS TURN ENEMIES against one another by making them believe that their closest friends have betrayed them. Needle demons wreak havoc and destruction throughout the Abyss and take any opportunity to bring that chaos to the mortal realms.

Con 19 (+10)	Int 14 (+8)	Cha 22 (+12)

NEEDLE DEMON TACTICS

A needle demon uses *rage of the betrayed* on as many targets as possible. It then moves around and looks for opportunities to attack with *claws of betrayal*. If *rage of the betrayed* recharges, the needle demon might save its next use for escaping from a hopeless fight.

NEEDLE DEMON LORE

Arcana DC 16: Needle demons possess greater cunning than most give them credit for, and they are more patient than many other demons. This craftiness often puts needle demons in the role of advisors to more powerful demons and even as the true powers behind manipulated puppets. However, their hunger for watching foes fight one another often gets the better of them, and they are rarely capable of more than simple deceptions.

ENCOUNTER GROUPS

Needle demons will join any cause that brings destruction and bloodshed, but it is never long before they turn on their allies.

If attacking in groups, neldrazus teleport in different directions, spreading out their enemies as much as possible.

NELDRAZU LORE

Arcana DC 14: Although difficult to control, neldrazus make excellent abductors for slavers or kidnappers that don't mind if their goods are slightly damaged.

ENCOUNTER GROUPS

Neldrazus are usually encountered with other demons, but take any opportunity to wreak havoc. They prefer being near places where they can keep their victims isolated, such as narrow ledges, steep slopes, or pit traps.

NYCADEMON TACTICS

A nycademon snatches a target and then flies into the air, attacking the target with *wicked edges* until the creature escapes. If the creature proves particularly dangerous, the nycademon drops the enemy from a high altitude and returns to the battle to grab new prey.

NYCADEMON LORE

Arcana DC 24: Nycademons are nicknamed “sky demons” for their tendency to swoop down and grab their enemies, carrying them high into the sky and releasing them to fall to their deaths.

Arcana DC 29: Nycademons put great stock in their physical superiority over their foes. This belief makes them overconfident when facing enemies that don’t immediately show signs of power and hesitant when facing enemies that show great strength.

ENCOUNTER GROUPS

Nycademons are mercenary enough to work with almost any creature in the short term, but their superiority complexes soon infuriate most allies.

POD DEMON LORE

Arcana DC 18: Pod demons are demons of madness that spawn tiny versions of themselves from their backs. A pod demon can psychically transfer its consciousness to any of its spawn, transforming that spawn's body into a new pod demon while its former body shrinks to podspawn form.

Arcana DC 23: The madness that possesses pod demons seems related to the Chained God, and some pod demons carry or wrap themselves in chains as a symbol of their allegiance.

ENCOUNTER GROUPS

Pod demons work with any demon that promises them the chance to terrorize the weak and fearful with their podspawn.

RUNESPIRAL DEMON TACTICS

A runespiral demon circles the periphery of a battlefield while attacking with *focused strike* and *charged lightning burst*. It shifts away from opponents to get the most out of *arcane arc*.

RUNESPIRAL DEMON LORE

Arcana DC 16: A runespiral demon has a thick shell carved deeply with arcane runes that give it mastery over lightning energy.

Arcana DC 21: Although lightning-powered runespiral demons are the most common, those using other types of energy exist, each bearing a different style of runes.

ENCOUNTER GROUPS

Other demons muster runespiral demons to their cause with a mixture of threats and promises of carnage.

RUPTURE DEMON TACTICS

A rupture demon possesses little sense of self and virtually no sense of self-preservation. It wades into melee, attacking any creatures that attack it. It uses *enveloping embrace* when it causes maximum destruction or when a more powerful or intelligent demon demands it.

RUPTURE DEMON LORE

Arcana DC 12: Rupture demons are oily demons made of liquefied evil. Barely sentient, rupture demons never work for themselves or have their own plans. In any place where a rupture demon is found, it's certain that a more powerful demon lurks nearby.

Arcana DC 17: Rupture demons are the weakest spawns of Juiblex, the demon lord of ooze and slime. Sages speculate that the rupture demons' aiding of other demons through their deaths must be part of some scheme by the enigmatic demon lord.

ENCOUNTER GROUPS

As servitors of Juiblex, rupture demons are found among other slimes and oozes.

YOCHLOL LORE

Arcana DC 13: Yochlols are among the most favored of Lolth's servants, and the Spider Queen sends her handmaidens to attend priests that have gained her favor.

Arcana DC 20: A yochlol can adopt two forms. In its true form, it is a strange, ooze-like creature similar to a heap of filth, with several tentacles and a red, baleful eye. In its other form, it appears as an attractive female drow.

DEVA LORE

Religion DC 16: A deva transforms spontaneously from bodiless soul to physical form, awakening as an adult already in possession of the skills required to defend the world against evil. With strong ties to fate, devas take the role of born heroes, leaders—or villains.

Religion DC 21: The life cycle of the deva parallels that of the rakshasa (MM 217)—a spirit constantly reincarnating to mortal form. When a deva gives in to iniquity to become a fallen star, its soul is corrupted. If it dies in that state, it returns to combat as an undead; if finally slain by radiant damage, it carries its wickedness into its next life and becomes a rakshasa—a fate that even evil devas revile.

ENCOUNTER GROUPS

Deva zealots and knights-errant are most often found leading or assisting creatures dedicated to a worthy cause. However, evil devas can create alliances with even the foulest creatures.

ASSASSIN DEVIL LORE

Religion DC 24: Rarely the masterminds of any plot, assassin devils fulfill the evil will of others, taking great pride in their lethal occupation.

Religion DC 29: Many assassin devils report directly to Asmodeus, covertly feeding him the secrets of their patrons. Devils that discover this treachery rarely respond with accusations and attacks. Instead, they attempt to dispose of the

treacherous servants or manipulate them into giving Asmodeus favorable information.

ENCOUNTER GROUPS

Assassin devils prefer to work alone because other devils get in their way. When they face a tough opponent, they rely on war devils and other melee combatants to distract the enemy while they move in for the kill.

(Left to right) misfortune devil, withering devil, gorechain devil, and assassin devil

MISFORTUNE DEVIL LORE

Religion DC 18: Misfortune devils encourage others to take unreasonable risks by preying on their inner desires. They delight in promoting addictive habits and exhorting the passionate into folly.

Religion DC 23: Misfortune devils enjoy using their silver tongues to trick others into making poor decisions. If the physical appearance of a misfortune devil would frighten away a prospective mark, it uses underlings to deliver the message, or magic to disguise itself in the form of a trusted friend.

ENCOUNTER GROUPS

Misfortune devils tend to attach themselves to legions of devils on some infernal errand, hoping to warp probability in Hell's favor.

SHOCKTROOP DEVIL TACTICS

The shocktroop devil starts combat with its *shocktroop* attack, using sword and shield whenever possible to daze and push enemies out of the way. Later in a fight, if shocktroop devils have forces to screen for them and the fight appears to be going against them, they might retreat. They then rest, regroup, and make a new lightning-fast assault.

SHOCKTROOP DEVIL LORE

Religion DC 20: Shocktroop devils are front-line soldiers for hell's armies. They break up enemy charges, shatter enemy formations, and can single-handedly slaughter a great number of the enemy.

Religion DC 25: It is important to hurt shocktroop devils as quickly as possible. A shocktroop devil fighting at full strength is a terrible foe.

ENCOUNTER GROUPS

Shocktroop devils work for anyone who promises incessant battle and threatens rigid discipline.

WITHERING DEVIL TACTICS

A withering devil uses its *draining ray* on ranged attackers, and then it closes the distance to keep such attackers within its aura. Withering devils position themselves near enemy melee combatants in order to affect them with *aura of exhaustion*.

WITHERING DEVIL LORE

Religion DC 18: Withering devils tempt and trick others into not caring for each other or their duties. They destroy individuals and groups by encouraging apathy and the lack of empathy.

Religion DC 23: Although their natural appearance is hideous, withering devils show extraordinary aptitude at disguising themselves as other humanoids. Some find and use magic to aid these attempts, but a heavy cloak and a dark room can prove just as effective.

ENCOUNTER GROUPS

Withering devils cooperate with those that have similar goals, but won't hesitate to abandon their allies if the situation looks grim.

INGENIOUS ENGINEERS OF THE FABULOUS, djinns work with that most transitory of elements—air—to create effects more enduring than the life spans of many worldly empires. Carving gigantic floating cities from the Elemental Chaos, djinns build shining palaces gleaming with treasures beyond mortal imagination.

Allying with the primordials in the struggle against the gods, the djinns paid a high price for their defeat. Many are still imprisoned in towers, mirrors, lamps, and other lowly relics, and the few that roam free in the world possess only a fraction of their former power.

DJINN LORE

Arcana DC 24: Djinns are native to the Elemental Chaos, but as punishment for their role in the war against the gods, they were scattered after their defeat. Many djinns were imprisoned in worldly objects or had their powers severely curtailed.

Arcana DC 29: Those djinns that are free seek to regain their lost might and reclaim the relics and

outposts of their old empires, many of which now lie in the world. Characters who aid a djinn in a quest to reclaim a cloud palace or locate an artifact can expect great reward. Creatures that oppose the ambition of the djinns are certain to earn their eternal enmity.

ENCOUNTER GROUPS

Djinns prefer to ally with their own kind, but they can often be found in the company of other creatures of the air. A djinn has no interest in leading other creatures, and all djinns rankle at the thought of taking orders from lesser beings. As a result, any alliance with a djinn is short-lived at best.

DRAGON

DRAGONS ARE WIDELY RENOWNED as some of the most powerful monsters in the world. Metallic dragons give fealty to Bahamut in his role as the Platinum Dragon. However, even the most equitable of these great creatures do not hesitate to use their might to crush opponents.

Despite their relatively benign nature, many metallic dragons engage in cruelty. All metallic dragons are fierce when protecting their treasures.

METALLIC DRAGON LORE

Nature DC 15: Metallic dragons love learned discourse, but they also have a keen sense of insight and are quick to sense deception. Those who seek to rob or deceive a metallic dragon are shown no mercy.

Nature DC 20: Metallic dragons can be found in a wide range of climes and locales, preferring to sequester themselves inside ancient sites of great learning. They are as likely to be found in the heart of a living city as in some ancient ruin.

Nature DC 25: Metallic dragons do not make pacts with other groups of creatures, but an individual dragon is very likely to have gathered a wide variety of lesser creatures around it. Metallic dragons treat such creatures as students and wards rather than as slaves. In return, these creatures act as the dragons' servants and guards, and are deeply loyal to their dragon lieges.

METALLIC DRAGON ENCOUNTERS

Many metallic dragons guard great works of magic or items of historical significance. As a dragon ages and grows in power, it gathers more precious objects. A metallic dragon is often found with a large number of lesser creatures, which help protect the dragon's lair and the treasures the dragon guards.

ADAMANTINE DRAGON

ADAMANTINE DRAGONS ARE TACTICIANS that supplement their melee abilities with blasts of thunderous power. They can be found anywhere, but prefer to lair in huge underground caverns.

ADAMANTINE DRAGON TACTICS

An adamantine dragon favors frontal assaults against a single target that it can take down quickly. When working with a group of allies, an adamantine dragon doesn't hesitate to bear the brunt of enemies' attacks. When fighting alone, an adamantine dragon attempts to isolate weaker foes first and finish them off quickly.

COPPER DRAGON

THE MOST COVETOUS AND MISERLY of the metallic dragons, copper dragons are nonetheless social creatures. They breathe destructive blasts of acid and make their lairs in dry, rocky uplands and mountains.

COPPER DRAGON TACTICS

Copper dragons lair in locations that let them exploit their excellent mobility. A copper dragon favors repeated *flyby attacks* while maneuvering to make the greatest use of blocking terrain. It is careful to limit its exposure to ranged attacks, and uses its breath weapon against multiple foes. With the right terrain and careful positioning, a copper dragon can avoid most of its opponents' attacks.

COPPER DRAGON LORE

Nature DC 20: Copper dragons lair among dry hills and mountains. They are willing to engage in prolonged battles, harrying their prey over long periods of time.

Nature DC 25: A copper dragon is covetous by nature; despite its pleasant demeanor, it seldom leaves a situation without gaining some benefit. Copper dragons breathe streams of acid and are among the swiftest of all dragons.

ENCOUNTER GROUPS

Copper dragons recruit creatures as fast and agile as they are, allowing them to conduct running skirmishes against their enemies. Hippogriffs, kenkus, rocs, and sphinxes are often found with copper dragons. Copper dragons sometimes hire human and elf cavalry to help run down their enemies.

GOLD DRAGON

GOLD DRAGONS BREATHE TORRENTS OF FLAME, and as they age, their scales grow bright with radiant energy. They lair in a variety of climes, favoring plains and rolling hills where they can easily survey the land. Gold dragons are renowned above all other children of Io, and few creatures dare to test the might of the oldest of them.

GOLD DRAGON TACTICS

Gold dragons seek to control the flow of battle. A gold dragon opens battle by catching as many foes as possible with its *breath weapon*, then scattering them using *frightful presence*. Once its foes are separated, the gold dragon pounces on the weakest.

GOLD DRAGON LORE

Nature DC 20: Gold dragons often lair in plains or hills, but their terrain preference is secondary to the goal of influencing a society or protecting a magic secret. Gold dragons often assume leadership of a group of lesser creatures. Gold dragons breathe powerful gouts of flame.

Nature DC 25: Gold dragons are usually honest and forthright, but they show little interest in the concerns of other creatures. Societies led by a gold

dragon sometimes find themselves at the mercy of its long-term plans.

Nature DC 30: Some gold dragons know a ritual that allows them to assume humanoid forms. A gold dragon divests itself of this disguise when threatened.

ENCOUNTER GROUPS

Gold dragons that have selfish or evil tendencies recruit minotaurs, ogres, and trolls as disposable shock troops. Other gold dragons might be defended by members of the societies they lead.

IRON DRAGON

QUICK AND DECEPTIVE BY NATURE, iron dragons hunt from the shadows, striking when and where they choose. Iron dragons prefer to lair in regions of low hills and deep forests, or other environments that offer good concealment for a large predator.

IRON DRAGON TACTICS

Iron dragons prefer to strike from ambush. An iron dragon's lair features an extensive series of chambers, each with multiple entrances and exits. The dragon stations traps or minions in each of these chambers, waiting until its foes are distracted by more obvious threats before it strikes.

IRON DRAGON LORE

Nature DC 20: Savage and surly, iron dragons are reclusive and prefer to strike from ambush. Iron dragons breathe blasts of lightning.

Nature DC 25: As iron dragons age, they become more impervious to attack. A battle with an older iron dragon promises to be a prolonged affair.

ENCOUNTER GROUPS

As befits their sly nature, iron dragons do not have allies so much as dupes. They lure dwarves, hobgoblins, minotaurs, and other greedy humanoids into working for them in return for a promise of easy loot. An iron dragon dispatches its "friends" to ambush intruders. Once the fighting starts, the dragon watches for a few moments. If its intercession can win the battle, it attacks. If its allies seem likely to be defeated, an iron dragon flees rather than risk its own hide.

SILVER DRAGON

DRAGON

SILVER DRAGONS ARE THE KNIGHTS-ERRANT of dragon-kind, frequently traveling the world in order to be at the flashpoint of interesting conflicts. Although they breathe cones of icy destruction, they favor melee combat over the use of their breath weapon.

SILVER DRAGON TACTICS

Silver dragons are straightforward and enthusiastic combatants. They move directly to confront as many foes as possible, attacking with tooth, claw, and tail. As they age, silver dragons become even more capable of shaking off hindering effects, and are among the most formidable of the dragons in face-to-face confrontation.

SILVER DRAGON LORE

Nature DC 20: Silver dragons travel widely, but prefer to inhabit the cool heights of mountains or cloud castles. Silver dragons breathe blasts of cold, and they also have significant melee abilities.

Nature DC 25: Silver dragons are susceptible to flattery and are highly intolerant of aggression or arrogance in others. They are slower in the air than most other dragons.

ENCOUNTER GROUPS

A silver dragon prefers to be in the front line of a battle. A silver dragon's idealism and crusading temperament lead it to recruit allies who share its sensibilities. Dwarves, dragonborn, angels, devas, and any other creatures that place ideals above profit might be found fighting alongside silver dragons.

DRAKKOTH

DRAKKOTH LORE

Nature DC 18: Drakkoths are a race of draconic creatures sometimes called dracotaurs because of their similarity in form to centaurs. Unlike dragons and dragonspawn, but similar to dragonborn, drakkoths have developed an advanced tribal culture. Drakkoths are nomadic, and the shifting boundaries of their lands can encompass vast swaths of forest or jungle.

Nature DC 23: Some drakkoth tribes are devoted to Tiamat and serve her with a bloodthirsty devotion. Others care little for the god of greed, choosing instead to honor a dragon patron (most often an elder or ancient green). A dragon that knows of this practice might seek drakkoth worshipers, inspiring (or tricking) a tribe into its service.

DUERGAR LORE

Nature DC 10: Duergar are kin to dwarves, but their long association with infernal powers has given them strange abilities and a thirst for blood. Their devilish nature leads duergar to prefer volcanic areas of the Underdark.

Nature DC 16: Long ago, duergar were members of a great clan of dwarves that delved deep into the Underdark and fell to a mind flayer assault. They endured uncounted years as slaves before fighting their way to freedom. Those duergar that escaped gained a perverse education from their captivity, becoming as corrupt as their former masters.

Nature DC 21: Believing that Moradin abandoned them during their enslavement, the duergar turned instead to the worship of devils. Most now take Asmodeus as their patron deity, and devilish power flows in their veins. Within their settlements, blood rites to infernal beings are common. Woe to

the slave that has outlived its usefulness or angered a capricious duergar master.

ENCOUNTER GROUPS

Duergar raid, pillage, and take prisoners when it suits them, using captives as slave labor and sacrifices for their infernal altars. For their raiding parties, they summon devils and employ troglodytes, orcs, ogres, and other wicked races.

COURE OF MISCHIEF AND STRIFE LORE

Arcana DC 20: Like "bralani" and "ghaele," the term "cour" is a title of nobility. Any rank associated with such a title varies among different eladrin lands and clans. However, all eladrin that attain such ranks adopt spheres of influence and are invested with powers pertaining to those spheres.

Arcana DC 25: Noble rank in eladrin society is rarely a matter of inheritance. Eladrin politics is a complex mix of popularity and mysticism beyond the comprehension of nonfey. Eladrin that attain the title of cour of mischief and strife are experts in their chosen art of discord.

FELL TAINT WARP WENDER TACTICS

A fell taint warp wender attacks foes with *psychic transposition*, keeping as many dazed as possible. If sorely pressed, the warp wender uses a move action to fly up after dazing a foe, making for a bruising fall for an enemy that fails its saving throw.

FELL TAINT LORE

Dungeoneering DC 10: Fell taints are strange, aberrant predators that kill by inflicting madness, feeding on the thoughts and emotions they steal from their foes.

Dungeoneering DC 15: The alien fell taints are only partially real. Although some aspect of them exists in the world, the rest is formed by the minds of those who view them.

Fell taints can live indefinitely without eating. They simply go dormant until a prospective meal comes near.

Fell taints come in a variety of types. Lashers must close to attack. Pulsars lurk in the shadows of high places, unleashing a flurry of mind-wrecking light rays from their eyes when prey is near. Thought eaters freeze their victims, consuming them at their leisure.

Dungeoneering DC 17: Fell taints originate in the alien Far Realm. There they are relatively weak predators, comparable to foxes in the world. They slip through weak points in the planar boundaries, seemingly finding them through instinct. When they come to the world or to other planes, they act as beacons for more deadly beings from their dread home. Their presence alone thins the barriers between planes.

ENCOUNTER GROUPS

Fell taints usually work only with their kind and other aberrant creatures of the Far Realm. Occasionally they are found with nonintelligent beings or undead. These alliances of convenience feature little cooperation and no communication.

Arcana or Religion DC 25: Fey lingerer knights pine to relive past glories; incanters seek to rediscover lost rituals and spells. When they are destroyed, fey lingerers transform into vengeful incorporeal spirits.

FIRBOLG LORE

Arcana DC 20: Firbolgs are hunters of the Feywild, the creators and keepers of the Wild Hunt. Small settlements dot firbolg territory in the deep wilderness of the Feywild, perched on precarious heights, dangerous terrain, or floating motes of rock for greater defensibility.

Firbolg society is made up of clans led by the mightiest warriors, usually masters of the Wild Hunt. Clan and family ties are strong among firbolgs.

Arcana DC 25: The firbolgs' religion is centered on three deities: the Maiden (Sehanine), the Mother (Melora), and the Crone (the Raven Queen). As a people, they follow the Maiden's demands that they walk a middle road between good and evil.

Firbolg priests, who are usually female, are called moon seers and are treated with great respect. Seers and elite warriors dedicated to the deities wear masks or helmets that cover their features.

Arcana DC 30: Firbolgs love trophies and treasure, but they value other creatures' promises more than wealth. Firbolgs call a hunt to pursue oath breakers. It is said that a dark ritual can be used to call firbolgs to the world to hunt one who has broken a vow made to the ritual's performer or those the performer represents.

ENCOUNTER GROUPS

Firbolgs respect strength and forthrightness, endurance and skill. Numerous firbolgs serve other fey and mighty nonfey. FOMORIAN LORE

Arcana DC 14: Fomorians have a peculiar obsession with the other denizens of the Feywild. They loathe them passionately, but desire their subjugation, not their destruction. In their minds, the ideal Feywild is one in which each fomorian lives as royalty, ruling over all other creatures. For this reason, they wage an eternal war with the eladrin and other fey, forever seeking to achieve this impossible goal.

Arcana DC 22: Ghost shamans enslave the spirits of those they kill. They use these spirits in combat, but also keep them as sources of amusement, forcing them to dance or play out haunting shadow plays. These evil giants make frequent forays into the Shadowfell to discover its secrets.

The totemist takes heads from those it slays and adds them to its chain of heads. Once it imbues the heads with necromantic power, its attacks with the chain of heads can have a different result depending on which head strikes the foe. Fomorian totemists often prefer a certain type of head and can become obsessive about their collections. One might favor eladrin heads, while another might prefer dwarves for their long beards. Some totemists select future

victims years before coming to claim their heads, patiently waiting for their chosen targets to “mature” and adopt the appearance they can see with their prescient evil eyes.

Cacklers laugh like mad fools almost constantly, but a cackler's manic air belies its fiendish mind. Cacklers are silent only when they seek to be hidden, and they have extraordinary stealth for their massive height and weight. Due to their ability to change size, cacklers sometimes adopt magic disguises to travel among lesser creatures. When they adopt the disguise of another creature, they easily take on its mannerisms. Their madness allows them to assume these other personalities with ease. However, such personalities remain with the cackler and sometimes emerge unbidden at later times.

Foul fomorian blinders take the eyes of other creatures and use them to attack foes. They delight in carrying these tiny trophies of their victims. Blinders know the most about fomorians and their culture, acting as the sages and scholars of their race. It's said that if any possess the secret to a defense against the evil eye, a blinder surely knows it.

Arcana DC 27: Fomorian butchers are the most sadistic among fomorians and have been known to cut slaves in half simply for the joy of it. Their simple-minded pleasure in slaughter makes them frequent targets for recruitment and manipulation by other creatures. Fomorian butchers often work with devils, greedily trading their souls and some mysterious afterlife for the power they desire in the Feywild and beyond.

GENASI LORE

Arcana DC 10: Genasi have five types of manifestation: airsoul, earthsoul, firesoul, thundersoul, and watersoul. A genasi can usually manifest only one type. Each manifestation bestows different powers and resistances.

Genasi share personality traits based on their manifestations. Typically, airsouls are fickle and capricious, earthsouls are stoic and cautious, firesouls are temperamental and impulsive, thundersouls are bold and proud, and watersouls are amenable and friendly.

Arcana DC 16: Some genasi can change their elemental manifestations or manifest multiple elements. Genasi can channel their elemental manifestations through their weapons, creating blades of fire, ice, or lightning.

Arcana DC 21: Genasi were originally servants of djinns, efreet, and other primordial. In the

Elemental Chaos, many genasi still serve primordial. During the war between the deities and the primordial, genasi rebelled and gained freedom. The primordial created archons to replace them.

While possessed, the target can see, hear, and feel everything the ghost legionnaire experienced. The possessed creature even appears to have the same wounds that the ghost legionnaire suffered.

Ranged 10/20; +16 vs. Will; 2d8 + 6 psychic damage, and the target is deafened and dominated (save ends both). While the target is dominated, the ghost legionnaire merges with the target, disappearing from sight. The legionnaire cannot attack or be attacked during this time. When the target saves, the legionnaire appears in a square adjacent to the target. Until the end of the encounter, the target gains a +5 bonus to History checks for *call of history*.

Soul Link

At the start of the encounter, ghost legionnaires' hit points combine into one sum. Damage to a legionnaire deducts from that total. When that total is reduced to 0, all legionnaires are destroyed simultaneously.

Call of History

Any character can make a DC 25 History check as a minor action to attempt to learn more about the ghost legionnaire. If the check succeeds, the legionnaire gains vulnerable 10 to that character's next attack.

ELDRITCH GIANT

ELDRITCH GIANTS COME FROM A DIFFERENT TIME—an earlier age when the primordials made the world. Although fashioned from fire, stone, and storm, the primordials' wondrous creation was heavily invested with magic, and the eldritch giants aided their primordial lords in the world's formation. Although their powers have ebbed since those days, eldritch giants remember their ancient mastery of magic and forever seek to regain it.

ELDRITCH TITAN TACTICS

An eldritch titan bathes an area in *eldritch field* at the start of a fight, then makes a *force hammer* attack to knock as many of its foes prone as it can. It uses its *eldritch fury* attacks as often as possible.

ELDRITCH GIANT LORE

Arcana DC 20: Eldritch giants dwell near fonts of magical power. They guard such places jealously, leaving them only to seek out more magical power, such as an artifact or a piece of lost knowledge. Eldritch titans lord over their lesser kin, jealously guarding the greatest items and secrets of magic for themselves.

Arcana DC 25: An eldritch giant's skin is tattooed with magical patterns that protect it and allow it to absorb conjurations and zones to bolster its attacks. These patterns also grant the giant the ability to teleport on flows of arcane energy. A particular eldritch giant or titan might have access to other magical powers, as well as rituals and magic items.

FROST GIANT LORE

Arcana DC 22: In their arctic lands, frost giants dwell in glacial caves or crude fortresses carved of stone and ice. From these holds, frost giants hunt game and raid for slaves and plunder. The mightiest frost giant in a clan, called a jarl, leads weaker giants through intimidation and violence.

Ice shapers, the frost giants' seers, gain respect from their kind for their auguries and wisdom. They engender fear with their cruelty and ferocity.

Arcana DC 27: A few frost giants have magical powers and can use runes, sorcery, and foul rituals. Such powers give a giant influence in its clan, if not outright leadership.

STONE GIANT

ATOP FORBIDDING PEAKS and in the deep reaches of mountain ranges dwell stone giants. These rockbound beings show little concern for smaller creatures, and they distrust strangers. A stone giant aroused to violence can be as startling and pitiless as an avalanche.

STONE GIANT LORE

Arcana DC 25: Stone giants move slowly and quietly among the mountains and within their rocky cave homes, blending with the terrain so well that they can easily waylay foes or go unnoticed. Brooding and contemplative, stone giants can rest in thought for years, sitting like statues. With weapons and thrown stones, they are expert hunters. When roused to anger, a stone giant is able to move its bulk with precision and quickness.

Particularly at night and during thunderstorms, stone giants play by throwing rocks at each other—the losing side is the one hit more often. During such contests, the giants seldom watch out for unexpected passersby. Such heedless “games” give stone giants a rougher reputation than they might deserve.

Arcana DC 30: Stone giants are artistic and craft-oriented, especially with stone. Runecarvers use arcane lore to craft runes of ancient magic upon

surfaces. With these spells set in stone, they smite foes. The art of rune magic might have originated with ancient stone giants, although dwarf artificers surely disagree.

STONE GIANT TACTICS

A stone giant hides among the cliffs and ambushes approaching enemies with hurled rocks. It then rushes in with *staggering sweep* to drive foes back. It stays in melee until opponents retreat, then goes back to hurling rocks until any threat is out of range.

GNOME

ALL GNOMES SHARE A CONNECTION TO THE FEYWILD, but that connection can manifest itself in starkly different ways. Some gnomes are naturally adept at channeling arcane currents, while others use the power of the beast within them.

GNOME ENTROPIST LORE

Nature DC 14: Gnome entropists target their foes with power channeled from the Elemental Chaos. Their innate ties to the magic of the Feywild interfere with this extraplanar power, driving some mad.

GOBLIN

GOBLINS ARE OFTEN SUBSERVIENT to the devotees of dark gods and other powerful masters. Such leaders appeal to the goblins' hostile and barbarous natures.

BUGBEAR WARDANCER

LIKE ALL BUGBEARS, THE WARDANCER is full of bluster and purpose. These warriors are a force to be reckoned with as they sow destruction across the battlefield.

BUGBEAR WARDANCER TACTICS

A bugbear wardancer relishes punishing as many enemies as possible, and so prefers to choose a different target each round. It will attack a foe within reach first, and if it hits it uses its move action to get into position to attack a new foe, setting up a flanking position with an ally that can then attack and similarly move.

BUGBEAR WARDANCER LORE

Nature DC 12: A bugbear wardancer leaps and howls as it arcs its vicious flail through the ranks of its foes. Its wide-reaching attacks and single-minded fury make it a dangerous foe.

Nature DC 17: Wardancers dedicate themselves to particular exarchs of Bane, forming small sects whose members create their own rival forms of battle dance.

Nature DC 19: More intelligent goblins who lead bugbear wardancers train them thoroughly, teaching them how to avoid harming their allies in combat. Through strict conditioning, hobgoblins sometimes plant command words in wardancers' minds to control them when they get out of hand.

GOBLIN ACOLYTE OF MAGLUBIYET TACTICS

A goblin acolyte moves freely across the battlefield, using *hand of Maglubiyet* to keep foes away from its allies or to hold more powerful combatants in place. It makes *slashing shroud* attacks with abandon, sticking close to badly wounded foes so that its *life scourge* aura prevents them from healing.

GOBLIN ACOLYTE OF MAGLUBIYET LORE

Nature DC 5: Acolytes of Maglubiyet devote their lives to the goblin exarch of Bane, modeling themselves in his image and drawing power from their faith.

Nature DC 10: An acolyte of Maglubiyet seeks signs of its patron's favor in all it does, such as thunder rolling at an auspicious moment or a bird of prey landing on a nearby tree. Such symbols can drive superstitious acolytes to fight against impossible odds, and an unfavorable sign can just as easily make them flee a fight before it even begins.

LOLTHBOUND GOBLIN

CENTURIES SPENT AS SLAVES TO THE DROW have driven some goblins to a mad devotion to the dark elves and their demon queen.

LOLTHBOUND GOBLIN TACTICS

Lolthbound goblins are dedicated to protecting their drow masters, fighting close to them to take advantage of *drow inspiration* and *drow protector* powers. A Lolthbound goblin uses *stinging blow* to maximize ongoing poison damage dealt by allies, reserving its *Lolthbound shriek* until surrounded.

LOLTHBOUND GOBLIN SLAVE LORE

Nature DC 16: Lolthbound goblin slaves are goblins brutalized by the drow. They are granted the power to fight in the name of the Spider Queen, but they have no will of their own.

Con 17 (+6)	Int 12 (+4)	Cha 16 (+6)

HOBGOBLIN FLESHCARVER TACTICS

A fleshcarver uses its *glaive flurry* for multiple purposes: to knock enemies back toward groups of allies, to drive foes into positions where they are flanked, or pull foes back if they try to get away. Until it becomes bloodied, a fleshcarver is aggressive and keeps enemies near it if possible. It becomes more defensive once bloodied and uses its dart powers more frequently.

Hobgoblin fleshcarvers aren't afraid to call a retreat when a battle appears unwinnable. They coordinate their movement so that they stay adjacent to allies as they retreat, to benefit from *phalanx soldier*. By using *toxic dart*, they try to keep enemies from pursuing them at full speed.

HOBGOBLIN FLESHCARVER LORE

Nature DC 12: A hobgoblin fleshcarver carries a jagged glaive and poisoned darts. Each glaive is crafted by a fleshcarver and perfectly shaped and weighted to match that hobgoblin's fighting style. The poison used on the fleshcarver's darts is harvested from serpents the fleshcarver hunts as a part of its training.

Nature DC 17: Fleshcarvers pride themselves on their martial ability, and welcome challenges from other weapon users. Still, pride won't draw a fleshcarver away from the thick of combat.

CHAIN GOLEM LORE

Arcana or Nature DC 21: Modeled after chain devils, chain golems often act as guardians over prisoners. Chain golems draw their foes in by wrapping them in chains, then pummel them mercilessly.

GRAY RENDER TACTICS

A gray render approaches battle mindlessly and fearlessly. It moves toward the nearest opponent, attacking in a fury and attempting to grab it. Once the render has a creature grabbed, it uses *dismembering bite* and *body sweep* at the first opportunity. The gray render flies into a destructive rage when bloodied, mindlessly clawing and knocking opponents about until it is killed or until it destroys its enemies.

GRAY RENDER

GRAY RENDER LORE

Nature DC 22: Although gray renders are natural creatures that mostly inhabit the world, many scholars have come to believe that their roots can be traced back to the Elemental Chaos, where they gained their chaotic, destructive impulses.

Nature DC 27: Entropy is bound within the existence of gray renders, causing them to leave a path of wanton devastation in their wake. Renders are drawn toward footholds of civilization, such as homesteads and outlying settlements, where they unleash their destructive urges.

HALF-ELF CON ARTIST

MANY HALF-ELVES ARE DIPLOMATS and peacemakers, capable of finding the common ground between any two groups. Others use their talents for their own interests. They can find the common ground between their hands and your money pouch with disconcerting ease.

A few honeyed words or a smile and a shrug can set foes to fighting one another or give an enemy reason to hesitate. Yet the con artist wounds with more than words. HALF-ELF CON ARTIST TACTICS

The con artist relies on *pathetic appeal* and *grifter's flight* to save itself when cornered.

HALF-ELF BALEFUL THAUMATURGE TACTICS

The baleful thaumaturge opens with *wall of shadow teeth*, hoping to keep a few enemies immobilized, and then uses *mouths of hell*. If engaged in melee, the half-elf uses *infernal slam* to move enemies into the area of *mouths of hell*. Otherwise the half-elf uses *soul bite* and attempts to stay out of melee.

Blood sacrifices, both their own and that of others, give baleful thaumaturges access to dark forces with which the thaumaturge must cajole and bargain (something at which half-elves excel).

It uses *swarm of flies* to force its enemies to break up, leaving them isolated and vulnerable to its orc allies. *Bolt of putrescence* is useful against heavily armored targets. Unlike many evil creatures, the death mage has no fear of dying for its master. If the battle goes poorly, it strides into melee to use *rotting touch* and eventually *death mark*.

HALF-ORC LORE

Nature DC 12: Half-orcs combine the daring of humans and the ferocity of orcs. Proud of their strength and decisiveness, half-orcs are often impolitic in social situations.

The origins of half-orcs are mysterious. Some say they are the product of crossbreeding between savage tribes. Others point to an ancient program to create the ultimate warrior. Still others say their origins are divine. All or none of these explanations might be true.

Half-orc hunters are found among many communities. Half-orc scarthanes are most often found living savage lives alongside full-blooded orcs, bearing ritual scars that prove their ferocity and worthiness.

ENCOUNTER GROUPS

Half-orcs exist between two cultures, and they often walk the line between wilderness and settled lands. Thus, they're adaptable to a wide range of associates.

HAWK LORE

Arcana DC 19: Although they originate in the Elemental Chaos, frost hawks can be found in the high places and cold regions of the world. A frost hawk's screech can hinder the movement of opponents, making them more vulnerable to its attacks.

Nature DC 10: Blood hawks are deadly raptors trained as hunters by many races. Their lethal claws deal wounds that continue to bleed, and their flying attacks make them difficult to engage.

HUMAN LORE

Nature DC 10: Human cavaliers ride horses or griffons. Cavaliers are prized as battle leaders, and they are often hired to lead nonhuman troops.

Human gladiators are accustomed to fighting a wide array of combatants. Although some gladiators are kept as slaves, others become wealthy by defeating foes in arena matches.

Human nobles claim that their families' status grants them leadership skills. However, once in combat some nobles find that they are unable to cope with bloodshed, and freeze up or run away.

Pirate captains keep their rowdy crews in line with a mixture of threats and bribes. Humans who have run afoul of the law become pirates to avoid capture and to satisfy the human need for new experiences and adventures.

Human slavers are themselves slaves to greed and power. They have great influence over their slaves, but the promise of freedom sometimes causes those slaves to revolt and remove the slaver from the picture—by any means necessary.

Nature DC 15: Human diabolists trade their souls for power. Both humans and devils share a lust for power, and many of a diabolist's other traits might be considered infernal.

Human javelin dancers dance around foes, hurling javelins like thunderbolts with uncanny accuracy.

Human knife fighters, trained for battle in alley fights and tavern brawls, tumble around the battlefield to slip blades into just the right places.

Human mystagogues are often found at the centers of cults.

Nature DC 20: Human dire beast hunters can be bounty hunters seeking to capture exotic creatures and sell them to the highest bidder, or they can be pompous nobles seeking to one-up other members of the nobility by mounting bigger and more exotic heads in their great rooms.

Human hexers practice a mixture of arcane and primal magic. While some work in harmony with nature, others pervert primal magic to command the spirits of the earth against their will.

HYDRA LORE

Arcana DC 22: Originally a native of the Elemental Chaos, the chaos hydra has filtered into the other planes. A chaos hydra's two heads contain elemental energy, which its bite unleashes on enemies.**Arcana DC 27:** As a chaos hydra is hurt, its body generates more heads. The bite attack of a generated head can vary randomly.**Nature DC 22:** When one head of a razor hydra sinks its fangs into an enemy, the other heads become obsessed with the taste of that enemy's blood. Razor hydras are also known as blood hydras for their ability to detect the scent of blood.**Nature DC 27:** Heroslayer hydras dwell in mountain caves. In early times, humanoids stalked razor hydras to collect the hydras' serrated teeth, which were valued as weapons because they cause victims to bleed long after receiving wounds.

ENCOUNTER GROUPS

KENKU LORE

Nature DC 12: These opportunistic avians live in tightly knit clans called flocks. Flocks are suspicious of outsiders, even other kenkus. They move in groups and are exceptionally good at working together.

Nature DC 17: Kenkus live predominantly in civilized regions but can be found throughout the world. Flocks live in or near major cities, often secretly. Flocks run a wide variety of criminal enterprises, favoring schemes and cons. They frequently use their ability to mimic sounds and voices. Violence is not their first choice, but kenkus can be formidable adversaries once steel is drawn.

POISONSCALE LORE

Nature DC 10: Although poison-scale slitherers are less hale than other lizardfolk, they have powerful tails that stabilize them in battle.

Poison-scale collectors are specially trained hunters with two important duties: collecting the toxic plants and creatures that poison-scales eat to produce their poison, and taking captives for slavery or sacrifice.

Among poison-scales, magi are honored advisors. Because of their toxic magic, they live short lives.

Poison-scale myrmidons lack other poison-scales' ability to produce poison, but they make up for it with greater strength and thicker scales.

Poison-scale savages enjoy "counting coup" by touching enemies with their tails. When they defeat their enemies, they take trophies from the bodies.

▶ **Final State:** The target attacks the nearest creature in its line of sight. If it cannot see any other creatures, it does nothing but move in a randomly chosen direction.

LYCANTHROPE LORE

Nature DC 16: Lycanthropy is hereditary, and lycanthropes mate with other lycanthropes to produce lycanthropic offspring. Some lycanthropes can also mate with humanoids, producing lycanthropic children. However, the blood is diluted in this way, and such children never change forms or instead become shifters.

Nature DC 21: Legend says that Melora created lycanthropes, and they are affected by the full moon and silver because of a feud between Melora and Sehanine. Lycanthropes are most active on nights with a full moon. Silver, the moon metal, cuts them to the quick.

MARUT LORE

Religion DC 22: Maruts require no sustenance. Maruts take no slaves, but they sometimes have mortal servitors in their astral fortresses. They do accept or request services as payment for completed tasks—so maruts might accept indentured servitude or other compulsory services. Although maruts rarely mistreat their servants, they are strict and uncompassionate taskmasters.

Religion DC 27: Although maruts are thought of as a unified race, they divide themselves along ethical and militaristic lines into units they call cadres. Marut cadres dedicated to philosophies other than the upholding of oaths and the fair dispensing of justice also exist. A few cadres serve the Raven Queen.

BARGAINING WITH MARUTS

A marut is an inscrutable being of cosmic balance. It is insightful and careful, but it is fallible. While under contract, a marut acts in its employer's interests. Only a reasoned appeal to a marut's beliefs, proof that a contract contains falsehood, or a mission of greater importance can cause a marut to abandon its task. Maruts might undertake tasks that support their beliefs without requesting payment.

JASON A. ENGLE

Religion DC 29: Maruts favor strict interpretation of laws and contracts and the upholding of oaths. The love of order and battle they share with angels is more than coincidental. Maruts consider themselves to be astral spirits of the air, despite the fact that they appear to be made of solid stone and to be clad in metal. The designation makes sense. Maruts fly without wings, and they live and roam about in mobile fortresses floating on the Astral Sea.

ENCOUNTER GROUPS

Maruts of various cadres work together and with other races when a task furthers their overarching beliefs. They do so under contract.

MYCONID GUARD TACTICS

When a colony comes under attack, myconid guards charge into combat. They use *pacification spores* to incapacitate enemies, and they attempt to subdue other enemies with *spiny strike* attacks.

MYCONID LORE

Arcana DC 12: Myconids are plant creatures touched by the madness of the fomorians. Although not necessarily evil, myconids strive to expand their territory and numbers, which pits them against other creatures competing for the same resources. Myconids like dark places and often prefer the Underdark and the Shadowdark to their home plane.

Because of the inherent resilience of a colony of myconids, other races cultivate them for cheap labor or enslave them. Drow, fomorians, and shadar-kai command myconids in great numbers.

Arcana DC 17: Vast mushroom forests sprawl over tracts of the Feywild and areas of the Underdark and the Shadowdark, providing myconids with ideal conditions under which to thrive and to multiply. Other fungal creatures represent a full range of predators and prey for myconids.

Arcana DC 19: Myconids communicate with each other by releasing spores. These spores convey

raw emotions such as fear, satisfaction, and desire. A colony's sovereign is the only myconid that can communicate with other types of creatures, which it does by using its telepathy.

ENCOUNTER GROUPS

Shadowfell- and Underdark-dwelling civilizations co-opt myconid colonies. Myconids can thrive in a wide range of places, including forest glades, deep dungeons, and the strange landscapes of the Feywild.

NEOGI GREAT OLD MASTER TACTICS

When forced into battle as the leader of its clan, a neogi great old master moves to the center of conflict, uses its long, scythelike legs for *scythe claw* attacks, and uses *enslaving bolt* to dominate its enemies.

NEOGI LORE

Dungeoneering DC 16: Neogi see everything in terms of ownership and lay claim to everything not already claimed by a creature more powerful than they are. Travelers of dark lands and strange realms, neogi embark on trade missions to barter with powerful evil creatures. They buy and sell slaves, exotic goods, and odd magic baubles.

Dungeoneering DC 21: Neogi originate in the Far Realm. They avoid the deadly mind flayers. Once owned by illithidlike beings in the Far Realm, neogi also avoid entanglements with illithids in the world.

Great old masters rule every neogi trade clan. Drooling horrors, they brim with vile intellect and the unborn spawn of their clans.

Neogi spawn are adolescents with small brains to match their relatively tiny bodies. They tumble about neogi colonies under the watchful eyes of their guardians.

ENCOUNTER GROUPS

NOTHIC LORE

Dungeoneering DC 18: Nothics are aberrant creatures that have drifted into the world and into other planes from the Far Realm. They have a semblance of intellect, but their hold on sanity is tenuous. A nothic can be identified by its awkward gait and its single eye, which can afflict enemies with various conditions. Nothics cackle maddeningly for no apparent reason.

Dungeoneering DC 23: Nothics serve powerful creatures that enjoy their erratic and amusing behavior. Nothic are also vicious combatants; they defend their masters with devotion.

Dungeoneering DC 25: Nothics live among the undead and in cults of Vecna, serving as guardians and jesters. Nothics in Vecna cults develop terrible gifts granted by the god of secrets. Their strong psychic connections to the Maimed God allow Vecna to see through the eye of any such nothic upon which he focuses attention, allowing him to gather secrets and keep tabs on those in his service.

ONI LORE

Nature DC 16: Oni devourers disguise themselves by day, attacking and eating victims at night.

Oni overlords are tyrants that rule over an organization of lackeys. They seek wealth, power, and control, and don't care who they step on to get it.

Nature DC 21: Oni devourers serve a variety of masters, including oni, vampires, hags, and cultists of Zehir. In isolated areas of the world, large groups of devourers infiltrate and take over monasteries, small towns, and trading outposts, using such locations' innocent appearances as a cover. In one case, a group of oni devourers occupied a mountaintop monastery for almost thirty years before adventurers linked them to cases of missing pilgrims and petitioners.

Although they love combat and bloodshed, oni overlords sometimes negotiate with potential victims if they can see an easy benefit. They take on a human appearance when they do so, but are usually identifiable by their excessive jewelry.

Nature DC 26: Oni thunderers serve powerful creatures, including dragons, demons, and even

undead. They command respect from their masters, leaving employers at inopportune moments if slighted.

GREEN SLIME TACTICS

In battle, a green slime attacks the nearest creature and uses *rapid dissolution* to dissolve the creature into slime.

OOZE LORE

Nature DC 10: Gray oozes are major nuisances in archaeological expeditions. Having fed on buried bones, they seek fresher targets among excavators and adventurers.

Dwarves consider green slime to be among the greatest nuisances hindering mining. The best way to destroy green slime is with fire or light.

Nature DC 14: Black puddings are dungeon-scavenging oozes covered in thick coatings of tarlike acid that eats away at everything, including rock, bone, and metal.

Nature DC 15: Gray oozes are especially dangerous in numbers or in close proximity to monsters that can take advantage of their bone-softening threat.

Nature DC 20: Abolethic skums are the results of failed attempts by aboleths to turn humanoids into servitors.

Nature DC 25: Aboleths and other psychic monsters use an abolethic skum's jarring psychic presence to soften up enemies for psychic attacks.

PHOELARCH

THE PLUMED HUMANOID PHOELARCH and the bird-like phoera represent two forms of one creature, half natural and half elemental. Phoelarchs are humanoid creatures with flames rippling over their skin. PHOERA

PHOERAS SOAR THROUGH THE ELEMENTAL CHAOS with concerns alien to their phoelarch counterparts.

PHOERA TACTICS

A phoera fights in a violent rage and often harms allies as well as enemies with its close attacks. It starts combat by using *feathers of flame*, preferably on multiple enemies. Then it focuses its claw attacks on a target that seems susceptible to fire damage, using *feathers of flame* again whenever the power recharges. When pressed by multiple foes, the phoera uses *flyby attack* to reposition itself.

RUST MONSTER LORE

Nature DC 14: Rust monsters devour metals to survive. Most spend their lives leaching minerals from stone, but purer manufactured metals draw them like blood draws sharks.

Since their food is scarce, rust monsters typically have only one or two young per brood. In places where food is plentiful, such as near a lode of metal ore, a pair of rust monsters can have dozens of offspring.

Nature DC 19: A rust monster that feeds on *residuum* retains it within its body. The *residuum* can be retrieved after its death. Those that have eaten a large amount of *residuum*, called dweomer eaters, eventually absorb it, growing in size and becoming hungry for more magic.

A GUIDE TO USING RUST MONSTERS

For a PC, the threat of losing gear can be greater than the threat of being reduced to 0 hp. Because of this fact, rust monsters can be more terrifying for players to face than a rampaging red dragon. A character who loses his or her armor becomes extremely vulnerable, and a character who has lost a magic weapon won't be as effective in later encounters. When a rust monster consumes a PC's weapon, it effectively gives that PC a significant penalty on attack and damage rolls until he or she can find a suitable replacement weapon. A PC who loses armor to a rust monster suffers an even more dramatic reduction in AC unless replacement armor can be found.

The possibility of recovering *residuum* from a rust monster or a dweomer eater alleviates this disadvantage to some degree, but the PCs will still need to find time to rest and use the Create Magic Item ritual, and they might even need to "head back to town" to find a way to replace the item. But you don't want an encounter with a rust monster to be one that forces the PCs to stop adventuring. When you include a rust monster in

an encounter, think about ways to allow the PCs to carry on, with perhaps less optimal gear. For example, the PCs might have had a previous encounter that provided armor or weapons that they wouldn't normally use, or the PCs might be able to fashion clubs or other simple weapons out of nearby materials.

Eventually, though, the PCs should have an opportunity to regain their lost equipment by using the *residuum* found in the monster. Although a PC might lose an item, it is intended that the loss be only temporary, which is why the *residuum* recovered from a rust monster is equal to the full value of the destroyed item. How the PCs deal with the loss is what makes the rust monster fun. Be wary of PCs who try to abuse a rust monster's powers to their advantage by using rust monsters to consume items the PCs would otherwise sell for one-fifth value. In such cases, you should reduce the resulting *residuum* to one-fifth value, effectively making the rust monster a free Disenchant Magic Item ritual.

SHARK

TO SAHUAGIN AND OTHER UNDERSEA PREDATORS, the shark is a totemic inspiration, a creature of blood frenzy and relentless hunger. To creatures that live above the waves, the sight of a shark's fin cutting the surface heralds doom.

FLESHTEARER SHARK

THE FLESHTEARER SHARK LOOKS like a creature from another age. For thousands of years, these sharks have hunted in oceans and lakes. Mariners greatly fear the fleshtearer, for even the sturdy hulls of ships cannot always withstand the rending teeth of this voracious beast.

FLESHTEARER SHARK TACTICS

Unless spurred into combat by its master or another beast, a fleshtearer shark lurks just outside its prey's sight. The fleshtearer shark charges into battle using *lockjaw charge*, and it continues using *lockjaw charge* to attempt to grab nearby foes even if doing that means provoking opportunity attacks when moving away from adjacent enemies. Even when facing formidable prey, a fleshtearer shark does not flee, fighting fiercely to the death.

FLESHTEARER SHARK LORE

Nature DC 10: Fleshtearer sharks are not confined to the open ocean. They also prowl rivers and underground lakes in their search for prey. A fleshtearer shark feeds constantly, making it a threat to any visitor to or inhabitant of the aquatic realm. Its teeth cause bleeding wounds.

Nature DC 16: Formidable aquatic creatures such as kuo-toas and sahuagin usually give the fleshtearer shark a wide berth, although some have managed to tame the beasts. They use the creatures as weapons on raids of large ships, ensuring that any sailors who fall overboard meet a quick end.

Nature DC 21: In the deepest watery caverns of the Underdark and in the farthest reaches of the oceans, fleshtearer sharks sometimes live for hundreds of years, growing to massive size. Vast swaths of water become uninhabitable because of the presence of such a beastly predator.

ENCOUNTER GROUPS

Sharks often ally with sahuagin, kuo-toas, and other underwater denizens.

Religion DC 12: Bonecrusher skeletons arise from the bones of ogres, minotaurs, oni, giants, and other large creatures.

Skeletal steeds rarely arise alone; they awaken from death with their riders or are created by rituals as mounts. Without need of rest or sustenance, these creatures provide tireless service to any warrior.

SLAAD

THROUGH A HAZE OF MADNESS, slaads see a world with too much order and too many constraints. Their disruptive attacks create disorder, but rarely on a large scale; their chaotic nature deters them from banding into effective armies.

FLUX SLAAD

MUTABLE FLUX SLAADS alter their defenses and vulnerabilities in response to enemy attacks.

FLUX SLAAD TACTICS

A flux slaad goes into *flux rage* early in a fight, throwing itself into the midst of its enemies and trying to slash down as many as possible. It then uses *claw slash* and shifts using *piercing reaction* to move into flanking position or out of harm's way.

Piercing Reaction (immediate reaction, when the flux slaad takes damage from an attack; at-will)

The slaad shifts 1 square.

Slaad Vulnerability Shift

A flux slaad starts the encounter with vulnerable 10 to one of the following six damage types, randomly determined: 1—cold, 2—fire, 3—lightning, 4—necrotic, 5—psychic, or 6—thunder. It has resist 5 to the other five types. When the slaad takes damage of the type to which it's vulnerable, its vulnerability changes to one of the other five damage types, randomly determined, and it gains resistance to the type it was previously vulnerable to.

FLUX SLAAD LORE

Arcana DC 19: Flux slaads sometimes accidentally slip through weak points between the planes; this commonly occurs near gatherings of bullywugs. The flux slaads often end up ruling tribes of bullywugs, which revere them as demon lords.

Arcana DC 21: Flux slaads garner little respect from their more deadly kin. In addition to being smaller and weaker than most, they are incapable of spawning. Many flux slaads thus lord over what creatures they may, often showing surprising restraint in their violent and unpredictable rages.

SLAAD SPAWN

SLAAD SPAWN ARE NOT SELF-AWARE. They desire only to cause chaos and carnage, with no care for their own or their allies' safety.

A slaad spawn prefers to use *chaotic slam* on the closest opponent, especially when the opponent is close to other enemies.

SLAAD SPAWN LORE

Arcana DC 20: From the moment of its gory birth from a living host, a young slaad presents a threat to all around it. Dim-witted and voracious, the slaad spawn must eat swiftly and well, or the chaotic energies contained within its body become unstable and explode. Assuming it survives those first bloody moments of life, the young slaad grows swiftly and, after just a few days, begins to display the appearance and powers that will define it in adulthood.

Arcana DC 25: Not all slaads reproduce through the implantation of chaos phage. Some are themselves infected with an aberrant form of chaos phage. These slaads grow embryos within their own bodies. This painful experience causes blood- and pus-filled boils on a slaad's body. Only injury releases the young slaads. This damage, and the dangerous nature of the spawn, cause many slaad spawners to avoid unleashing the spawn from their flesh.

SPIDER

GIANT ARACHNIDS CRAWL everywhere in the world and in the planes beyond. Their webs can be found strung in dark forests, ancient ruins, damp caverns, abandoned buildings, or sewers—anywhere that prey can be caught and devoured.

BRISTLE SPIDER

THIS MASSIVE SPIDER hunts within vast overgrown jungles, where the plant life is large enough to afford numerous places from which it can surprise the unwary. Bristle spiders have also been known to make lairs underground, where larger caverns and dungeon chambers offer places in which they can hide and stalk their prey.

BRISTLE SPIDER TACTICS

PHASE SPIDER TACTICS

A phase spider prefers to surprise its prey, using its *ethereal bite* attack to teleport in, bite an enemy, and then teleport out of harm's way. Possessing superior mobility through their natural ability to teleport, phase spiders rarely engage a single enemy for longer than a round or two before moving on to another opponent.

Phase spiders use hit-and-run tactics in order to wear down their prey.

STAR SPAWN

WARLOCKS AND SAGES KNOW that when one looks up at the stars, some stars glare back with hunger. When a star hangs in the correct position in the sky and its light strikes the world at precisely the right angle, the star spawn walk the world. Star spawn are utterly malevolent beings.

STAR SPAWN LORE

Dungeons and Dragons DC 20: The star spawn are creatures sent by the baleful stars of the night sky, accursed celestial objects that gaze upon the world with a mixture of hatred, anger, and hunger. The spawn are the avatars of these stars, sent to wreak havoc. Some stars have only one spawn, but others manifest a multitude of creatures. The spawn of a particular star appear only once a year at most, but sometimes a spawn becomes trapped in the world and continues its depredations until slain.

Dungeons and Dragons DC 25: Sometimes cults form around a star spawn. Some star spawn simply devour their worshipers, but others tolerate their presence and use them as allies. Warlocks who have the star pact flock to star spawn. Whether they serve, study, or slay them depends on a particular warlock's goals and attitudes.

Dungeons and Dragons DC 27: Star spawn are known to appear before great tribulations and at the convergence of unparalleled levels of power. During great

Wars, battles between divine beings, and the preparation of mighty rituals, the spawn appear across the land. The star called Allabar, a wandering object known as the Opener of the Way, courses across the sky, causing the spawn of any stars it nears to manifest upon the world. Some believe that Allabar is a trickster star that merely spreads havoc between the world and its kin. Others claim that Allabar itself is the greatest of the stars, a strange being from beyond the world, manipulating the other stars to its own end. What that end could be, and the role played by the star spawn, none as yet can guess. Before his disappearance, the warlock Thulzar claimed that he had successfully charted the incursions of all star spawn since the fall of Bael Turath. His research showed an emerging pattern, but he, his tower, and all his works simply vanished one starless night, leaving behind only a smooth, glass-coated crater.

HERALD OF HADAR

HADAR'S DULL RED GLOW is barely visible in the night sky, as the star slowly burns down into a lifeless, dead cinder. According to the Revelations of Melech, Hadar was once the brightest star in the sky, but during the calamities that led to the fall of Bael Turath, it surged into a searing brand of light and then faded into a blood-red ember. Hadar now hangs on the edge of annihilation. A herald of Hadar is an avatar of Hadar's dying gasps, a fiendish monster that grows stronger in the presence of living creatures.

HERALD OF HADAR LORE

Dungeoneering DC 18: A herald of Hadar is spawned by its namesake, a dying ember of a star. The herald feasts on life energy, channeling it back to its creator in an effort to avert its demise.

MAW OF ACAMAR

THE STAR ACAMAR IS A CORPSE STAR, a dead star of utter inky nothingness that devours other stars that draw too close. The maw of Acamar is that star's hunger made real, an avatar of devastation that eats everything in its path.

In battle, the maw of Acamar strides amid its foes, relying on the powerful magic that surges from its form to drag victims to their doom. Winds howl as Acamar draws the very air around the maw into itself. Creatures slain by the maw are ripped apart and dragged away to disappear into Acamar's endless darkness. The maws are deadlier still when encountered in numbers; they crowd around a foe and tear him in half as they pull him in several directions at once.

FRANZ VORWINKEL

MAW OF ACAMAR LORE

Dungeoneering DC 18: A maw of Acamar enters the world when the dark influence of the star Acamar is at its peak. The maw wanders the world, pulling living creatures into its destructive void to feed Acamar, a dead star wracked by endless hunger.

SCION OF GIBBETH

GIBBETH IS A CURSED GREEN STAR, said to have at its core an utterly unknowable being. Warlocks and other arcane users say that Gibbeth shall show its face only at the end of the world, when the very glare of its eyes and the monstrous aspect of its being pushes all of creation into inescapable madness. The scion of Gibbeth is a terrible shard of that green star, a herald of Gibbeth's curse and a forerunner of what might come.

When the scion appears, no two observers can agree on its actual appearance. Some see a green-skinned, horned giant, while others report a red, spiderlike creature with a child's face or a serpentine monstrosity with dozens of gibbering mouths along its body. Sages maintain that this outer appearance is merely an aspect projected by the shard that dwells within the scion. The mental strain of seeing even a shadow of Gibbeth's essence is such that mortal minds must conjure knowable, though strange, images to contain it. Anyone who sees the scion's true form is doomed to madness.

SCION OF GIBBETH LORE

Dungeoneering DC 20: A scion of Gibbeth wanders the world seemingly at random. Prophets, the insane, and cultists are drawn to its presence. The scion typically lashes out at any living creature that draws near, but it tolerates these worshipers.

Dungeoneering DC 25: The scion of Gibbeth manifests in the world when Gibbeth is in conjunction with the star Allabar, a celestial object known as the Opener of the Way. Allabar wanders the sky in a pattern unlike that of any other star. It follows a seemingly random path, and when it draws near one of the baleful stars, that star's spawn appear in the world. The wandering star avoids only Acamar, because that object's hunger is so great that it would destroy even the star that would open its path to the world.

STEEL PREDATOR

BORN OF THE MACHINATIONS OF BANE, steel predators are deadly planar creatures designed for war. Ranging through the Astral Sea and into the world, predators are relentless hunters, sometimes pursuing quarry for weeks and across planar boundaries. They delight in the consumption of the *residuum* in magic items, and so the more richly endowed the target, the farther they will pursue it.

⊕ **Vicious Pounce** (standard; at-will)

The steel predator charges and makes the following attack in place of a bite attack: +25 vs. Fortitude; 2d12 + 5 damage, and the target is pushed 1 square and knocked prone. The predator moves into the space vacated by the target.

⊕ **Resonating Roar** (standard; recharge ☒☒ or when the steel predator takes thunder or lightning damage) ◆ **Thunder**

STEEL PREDATOR TACTICS

The steel predator stalks its prey patiently, entering combat only when it thinks it is assured of victory. It begins with a *vicious pounce*, then releases a *resonating roar* in the midst of its foes. While the steel predator waits for that power to recharge, it makes *snap jaw* attacks against the closest foes, using *shifting steel* to keep targets close.

STEEL PREDATOR LORE

Arcana or Religion DC 14: Created by Bane to track and slay the foes of the god of conquest, steel predators are relentless hunters that pursue their prey even across the planes. Thunder and lightning attacks made against a steel predator only increase the creature's power.

Arcana or Religion DC 22: Steel predators are agile, graceful beasts. These metallic felines are often led by teams of bladelings in Chernoggar, where they are most frequently found.

Arcana or Religion DC 27: Steel predators have a taste for magic items. Once they have slain a foe, they often consume the entire body, including both flesh and magical items.

Arcana or Religion DC 29: A steel predator's body contains *residuum*, which can be extracted upon its death. For this reason, many planar creatures hunt steel predators for profit and sport.

ENCOUNTER GROUPS

Steel predators can be found anywhere the servants of Bane do battle. They serve faithfully with other creatures working toward common goals, but can quickly turn on those that betray Bane's ideals.

TROGLODYTE THRASHER TACTICS

A troglodyte thrasher enjoys going after the biggest, toughest, or most physically dangerous-looking enemy. It tends to ignore ranged attackers, but attacks them if no other enemies remain. If a thrasher is hit by a melee attack, it usually focuses its attention on that attacker during its next turn.

TROGLODYTE THRASHER LORE

Dungeoneering or Nature DC 14: Although truly intelligent members of the troglodyte race do exist, the dimwitted hordes vastly outnumber them. Troglodyte thrashers possess only a beast's intellect. Other troglodytes keep thrashers in cages to prevent them from turning on each other or on their more intelligent cousins.

CHRIS SEAMAN

TROGLODYTE DEEPSOURCE TACTICS

In combat, a deepsource remains safely behind its brutish allies. If attacked, it uses *blinding stench* to incapacitate the enemy and cover its retreat. The deepsource coordinates with its allies in combat, ordering other troglodytes into formations where their auras can have the most potency in conjunction with the deepsource's *debilitating ray* and *dizzying stench*.

TROGLODYTE DEEPSOURCE LORE

Dungeoneering or Nature DC 14: A troglodyte deepsource often serves alongside a troglodyte curse chanter or in the curse chanter's stead as the leaders of a tribe. A deepsource is a shaman for a troglodyte tribe. Troglodytes often rely on deepsources for guidance in ritual as well as in combat.

TROGLODYTE TEMPLE CHAMPION TACTICS

Troglodyte temple champions are not subtle; they charge into combat as soon as possible, flinging javelins when unable to attack in melee. Temple champions use their *sweeping trip* attacks to stop opponents from escaping.

TROGLODYTE TEMPLE CHAMPION LORE

Dungeoneering or Nature DC 14: Hidden away deep underground are foul troglodyte temples dedicated to demons such as Demogorgon and deities such as Torog. The strongest troglodytes from nearby tribes rise to become temple champions.

Temple champions fight to the death with fanatical devotion; anyone taken alive by a temple champion is quickly sacrificed in a nearby temple.

Dungeoneering or Nature DC 19: Due to the comprehension and patience required of a temple champion, the strongest warriors are often the smartest as well. If temple champions leave their temples' boundaries, they often do so at the behest of their leaders and as the head of a larger force of less intelligent troglodytes.

Nature DC 16: Ice trolls inhabit the Frostfell, but they occasionally make their way into less frigid regions. Ice trolls are more intelligent than most other trolls, and they have learned to craft weapons. They prefer to use such weapons in combat instead of their claws.

BLADERAGER TROLL TACTICS

A bladerager troll attacks the most physically menacing target, but quickly switches to the enemy that appears to be doing the most damage or hindering it the most. It doesn't employ concerted tactics beyond dealing as much damage to its enemies as possible.

BLADERAGER TROLL LORE

Nature DC 16: Bladerager trolls are barely sentient berserker trolls. They run at their foes, ripping them limb from limb and devouring the pieces. Bladeragers are created in violent rituals that bind weapons and metal shards with troll flesh. In constant pain, bladeragers survive because of their regenerative capabilities, but death breaks the binding magic in an explosion of metal and blood.

Nature DC 21: Duergar, drow, and mind flayers commonly capture trolls and enslave them. On the surface of the world, bladerager trolls can be found in the employ of oni and minotaurs. Some minotaur cabalists know the secret to binding magic weapons and armor into trolls, giving the trolls the properties of the metal items that cut their bodies. Such items can often be retrieved after the bladeragers' destructive deaths.

TROLL VINESPEAKER LORE

AMBUSH VINE LORE

Nature DC 20: Ambush vines infect vast wilderness areas in the Feywild. Although less common in the world, they often blight the deepest reaches of forests or swamps. They can swim through water, burrow through the earth, and climb through tree-tops to reach prey.

Nature DC 25: An ambush vine has unusual cunning for a plant. It often hides beneath the ground or attempts to blend in with other plants.

Nature DC 27: Occasionally, a blight of ambush vines becomes so vast that it encroaches on civilization. Some scholars speculate that widespread occurrences of ambush vines in the former eladrin empire of Cendriane contributed to its downfall.

WARFORGED TITAN LORE

Arcana or Nature DC 22: Among the first warforged created, warforged titans are barely sentient, with just enough intelligence to follow changing commands in the heat of battle.

Arcana or Nature DC 27: A warforged titan comprehends allegiance in simplistic terms. It often follows the commands of someone that has a symbol of the titan's creator, regardless of its creator's goals or how much time has passed since its creation.

When a witherling closes with a foe, it uses *sudden leap* in an effort to gain combat advantage. It then attacks the first foe to grant combat advantage to it.

WITHERLING HORNED TERROR TACTICS

A horned terror is as direct and unsubtle a warrior as it was in life. It uses *rampaging charge* as often as it can, even provoking opportunity attacks in order to run down as many foes as possible.

WITHERLING RABBLE

WHEN GNOLLS OR NECROMANCERS create witherlings, the process sometimes goes awry. The magic instead creates witherling rabble, inferior forms of the creatures.

Witherling Rabble	Level 9 Minion Skirmisher
Small natural animate (undead)	XP 100
Initiative +10	Senses Perception +4; low-light vision
HP 1; a missed attack never damages a minion.	
AC 23; Fortitude 21, Reflex 22, Will 20	
Speed 8, climb 6	
⊕ Claw (standard; at-will)	
+14 vs. AC; 9 damage.	
Combat Advantage	
A witherling rabble deals 2 extra damage on attacks against any creature granting combat advantage to it.	
Pack Attack	
A witherling rabble's melee attacks deal 2 extra damage against any enemy that has two or more of the rabble's allies adjacent to it.	
Sudden Leap (move; at-will)	
The witherling rabble jumps 4 squares. During the jump, it gains a +5 bonus to AC against opportunity attacks, and any enemy that misses the rabble with an opportunity attack grants combat advantage to it until the end of the rabble's turn.

WITHERLING LORE

Religion DC 14: Yeenoghu recently imparted to the gnolls the knowledge of the blasphemous process used to create witherlings. A war between Yeenoghu and Orcus is brewing, and the witherlings are but one of several new weapons that the Prince of Gnolls has given to his children.

ENCOUNTER GROUPS

Witherlings were first made by gnolls, but the secret of their creation has spread to necromancers of other races.

Level 6 Encounter (XP 1,300)

- ◆ 1 gnoll huntmaster (level 5 artillery, MM 132)

WOOD WOAD

WOOD WOADS SEEK VENGEANCE for each tree that falls to the axe. A creature that intrudes into a forest protected by wood woads is held responsible for the actions of all previous intruders.

Close burst 2; targets one creature; no attack roll; the target takes a -2 penalty to attack rolls, all defenses, and saving throws (save ends). WOOD WOAD TACTICS

A wood woad uses *nature's judgment* as soon as it can, preferring to target an enemy that relies on speed or mobility rather than an enemy that wishes to hold a position. It stays near allies in order to defend them.

WOOD WOAD LORE

Nature DC 14: Those who have extensive knowledge of nature, such as rangers, druids, and wardens, can usually overcome a wood woad's magic more easily than those who are not wise in the ways of the woods.

Nature DC 19: Wood woads and dryads share a common heritage. Dryads are sometimes at peace, comforted by the presence of their trees, but wood woads are constantly enraged by slain forests.

ENCOUNTER GROUPS

Wood woads gladly ally with other creatures that share their drive to protect the natural world. Centaurs and dryads fight alongside them. Clever fey creatures, particularly gnomes and eladrin, sometimes trick wood woads into allying with them by creating a link between the fey's goal and the wood woads' desires.

Level 8 encounter (XP 1,800)

- ♦ 2 dryads (level 9 skirmisher, MM 96)
- ♦ 1 vine horror spellfiend (level 7 artillery, MM 260)

XORN LORE

Dungeoneering DC 23: Xorns are creatures from the Elemental Chaos that feed on metal and minerals. Their appetite for rare gemstones makes them open to bargaining. However, they have been known to engage in diplomacy while using the time to set up ambushes.

ENCOUNTER GROUPS

Xorns bargain their services across the planes in exchange for precious metals and gemstones. They can be found aiding the mining or smelting operations of duergar or fire giants, and sometimes allied with galeb duhrs or other creatures of elemental earth.

Level 10 Encounter (XP 2,400)

GLOSSARY

This glossary defines game terms used in this book. The glossary supersedes previous sources and incorporates clarifications and new rules.

aberrant [origin]: Aberrant creatures are native to or shaped by the Far Realm.

acid [keyword]: A damage type.

aftereffect: An aftereffect automatically occurs after another effect ends. In a power description, an “Aftereffect” entry follows the effect it applies to.

A target is sometimes subject to an aftereffect after a save. If that save occurs when the target is rolling multiple saving throws, the aftereffect takes effect after the target has rolled all of them.

air [keyword]: An air creature is strongly connected to the element of air.

all-around vision: Enemies can't gain combat advantage by flanking a creature that has all-around vision.

altitude limit: If a creature has a specified altitude limit, the creature crashes at the end of its turn if it is flying higher than that limit. See also **fly speed**.

angel [keyword]: Angels are immortal creatures native to the Astral Sea. They don't need to breathe, eat, or sleep.

animate [type]: Animate creatures are given life through magic. They don't need to breathe, eat, or sleep.

aquatic [keyword]: Aquatic creatures can breathe underwater. In aquatic combat, an aquatic creature gains a +2 bonus to attack rolls against nonaquatic creatures. See also “Aquatic Combat,” *Dungeon Master's Guide*, page 45.

aura: An aura is a continuous effect that emanates from a creature. The aura affects each square within line of effect and within a specified range of that creature's space. The aura does not affect that creature, unless otherwise noted, and is unaffected by terrain or environmental phenomena.

A creature can deactivate or reactivate its aura as a minor action. If the creature dies, the aura ends immediately.

If auras overlap and impose penalties to the same roll or game statistic, a creature affected by the overlapping auras is subject to the worst penalty; the penalties are not cumulative. Similarly, a creature in the overlapping area takes damage only from the aura that deals the most damage, regardless of damage type.

beast [type]: Beasts are either ordinary animals or creatures akin to them. They behave instinctively.

blind [keyword]: A blind creature relies on special senses, such as blindsight or tremorsense, to see

within a specified range, beyond which the creature can't see. The creature is immune to gaze attacks and cannot be blinded.

blindsight: A creature that has blindsight can clearly see creatures or objects within a specified range and within line of effect, even if they are invisible or obscured. The creature otherwise relies on its normal vision.

burrow speed: A creature that has a burrow speed can move through loose earth at a specified speed, and the creature can move through solid stone at half that speed. The creature can't shift or charge while burrowing.

change shape: A creature that has the polymorph power *change shape* can assume the form of another creature. The power specifies the type and size of that form. The new form lasts until it is changed or until the creature dies.

The creature retains its statistics in its new form. Its clothing, armor, and other possessions do not change with the new form.

If the creature can use *change shape* to assume the form of an individual, the creature must have seen that individual. Other creatures can make an Insight check (opposed by the creature's Bluff check with a +20 bonus) to discern that the form is a disguise. See also **polymorph**.

charm [keyword]: A charm power controls or influences a subject's actions.

climb speed: A creature that has a climb speed moves on vertical surfaces at that speed without making Athletics checks to climb. While climbing, the creature ignores difficult terrain and doesn't grant combat advantage because of climbing.

clumsy: Some creatures are clumsy while using a specific movement mode (noted next to that mode in the creature's “Speed” entry), and others are clumsy while on the ground (noted next to the creature's speed). While a creature is clumsy, it takes a -4 penalty to attack rolls and all defenses.

cold [keyword]: A damage type. A creature that has this keyword is at least partially composed of ice.

conjunction [keyword]: A conjunction power creates a conjunction, which is an object or a creature of magical energy. A conjunction occupies no squares, is unaffected by the environment, does not need to be supported by a solid surface, cannot be attacked or physically affected, and ends immediately when its creator dies.

If a conjunction can be attacked or physically affected, it uses its creator's defenses. Unless an attack specifically targets conjunctions, only the attack's damage (not including ongoing damage) affects the conjunction. If a conjunction can attack, its creator makes the attack, determining line of sight normally but determining line of effect from the conjunction.

If the power that creates a conjuration includes the ability to move it, the conjuration is considered a movable conjuration. A movable conjuration ends at the end of its creator's turn if the creator is **not** within range of at least 1 square it's in (using the power's range) or if the creator doesn't have line of effect to at least 1 square it's in. A conjuration can't be moved through a solid obstacle.

- construct [keyword]:** Constructs are not living creatures, so effects that specifically target living creatures do not work against them. They don't need to breathe, eat, or sleep.
- darkvision:** A creature that has darkvision can see in dim light and darkness without penalty.
- demon [keyword]:** Demons are chaotic evil elemental creatures native to the Abyss. They don't need to sleep.
- devil [keyword]:** Devils are evil immortal creatures native to the Nine Hells. They don't need to sleep.
- disease [keyword]:** Some powers expose a target to a disease. If a creature is exposed to a disease one or more times during an encounter, it makes one saving throw at the end of the encounter to determine if it contracts the disease. If the saving throw fails, the target is infected. See also "Disease," *Dungeon Master's Guide*, page 49.
- dragon [keyword]:** Dragons are reptilian creatures. Most of them have wings as well as a breath weapon.
- earth [keyword]:** An earth creature is strongly connected to the element of earth.
- earth walk:** A type of terrain walk. A creature that has earth walk ignores difficult terrain that is rubble, uneven stone, or an earthen construction.
- elemental [origin]:** Elemental creatures are native to the Elemental Chaos.
- extra damage:** Many powers and other effects grant the ability to deal extra damage. Extra damage is always in addition to other damage. This means an attack that deals no damage can't deal extra damage.
- fear [keyword]:** A fear power inspires fright.
- fey [origin]:** Fey creatures are native to the Feywild.
- fire [keyword]:** A damage type. A fire creature is strongly connected to the element of fire.
- fly speed:** A creature that has a fly speed can fly a number of squares up to that speed as a move action. To remain in the air, the creature must move at least 2 squares during its turn, or it crashes at the end of its turn. While flying, the creature can't shift or make opportunity attacks, and it crashes if it's knocked prone. See also "Flying," *Dungeon Master's Guide*, page 47.
- force [keyword]:** A damage type.
- forest walk:** A type of terrain walk. A creature that has forest walk ignores difficult terrain that is part of a tree, underbrush, or some other forest growth.

gaze [keyword]: A type of attack. Blind or blinded creatures are immune to gaze attacks, and a creature cannot make a gaze attack while blinded.

giant [keyword]: Giants are Large or larger humanoid creatures.

grabbed: Being grabbed means a creature is immobilized. Unless otherwise noted, a grab lasts until the end of the grabber's next turn, and the grabber can sustain the grab as a minor action and end it as a free action. Certain circumstances end a grab: if the grabber is affected by a condition that prevents it from taking opportunity actions, if either the grabber or the creature it's grabbing moves far enough away that the grabbed creature is no longer in the grabber's reach, or if the grabbed creature escapes. See also "Escape" and "Grab," *Player's Handbook*, pages 288 and 290.

half damage: When a power or another effect deals half damage, apply all modifiers to the damage, including resistances and vulnerabilities, and then divide the damage in half.

healing [keyword]: A healing power restores hit points.

hidden: When a creature is hidden from an enemy, the creature is silent and invisible to that enemy. A creature normally uses the Stealth skill to become hidden.

homunculus [keyword]: Homunculi are animate constructs tasked with guarding a creature, an area, or an object.

hover: If a creature can hover, it can remain in the air without moving during its turn. It can also shift and make opportunity attacks while flying. See also **fly speed**.

humanoid [type]: Humanoid creatures vary greatly in how much they resemble humans. Most are bipedal. They include humans as well as monstrous humanoids such as yuan-ti.

ice walk: A type of terrain walk. A creature that has ice walk ignores difficult terrain that is ice or snow.

illusion [keyword]: An illusion power deceives the mind or the senses.

immortal [origin]: Immortal creatures are native to the Astral Sea. Unless they are killed, they live forever.

immune: A creature that is immune to a damage type (such as cold or fire), a condition (such as dazed or petrified), or another specific effect (such as disease or forced movement) is not affected by it. A creature that is immune to charm, fear, illusion, poison, or sleep is not affected by the nondamaging effects of a power that has that keyword. A creature that is immune to gaze is not affected by powers that have that keyword.

implement: The implement keyword identifies a power that can be used through an implement. A monster's statistics block notes the implements it uses. See also "Adding Equipment," *Dungeon Master's Guide*, page 174.

insubstantial: When a creature is insubstantial, it takes half damage from any damage source, including ongoing damage. Some creatures are inherently insubstantial, which is noted in their "Resist" entries. See also **half damage**.

lightning [keyword]: A damage type.

living construct [keyword]: Unlike other constructs, living constructs are living creatures.

low-light vision: A creature that has low-light vision can see in dim light without penalty.

magical beast [type]: Magical beasts resemble beasts but often behave like people.

marked: When a creature marks a target, that target takes a -2 penalty to attack rolls for any attack that doesn't include the creature as a target. A creature can be subject to only one mark at a time, and a new mark supersedes an old one.

maximum altitude: See **altitude limit**.

minion: A minion is destroyed when it takes any damage. If a minion is missed by an attack that deals damage on a miss, the minion doesn't take that damage.

mount [keyword]: A creature that has the mount keyword has at least one mount power. A mount power is usable only when the creature's rider has the Mounted Combat feat. See also "Mounted Combat," *Dungeon Master's Guide*, page 46.

natural [origin]: Natural creatures are native to the natural world.

necrotic [keyword]: A damage type.

ooze [keyword]: Oozes are amorphous creatures. When an ooze squeezes, it can move at full speed (rather than half speed), it doesn't take the -5 penalty to attack rolls, and it doesn't grant combat advantage because of squeezing.

overland flight: Overland flight works like a fly speed with one exception: A creature can take a move action to use overland flight only if it has taken no actions that turn, except free actions or move actions using overland flight. The creature can then take only those actions until the start of its next turn. See also **fly speed**.

phasing: While phasing, a creature ignores difficult terrain and can move through obstacles and other creatures, but it must end its movement in an unoccupied space.

plant [keyword]: Plant creatures are composed of vegetable matter. They don't need to sleep.

poison [keyword]: A damage and effect type.

polymorph [keyword]: Polymorph powers change a target's physical form. If a target is affected by more than one polymorph power, only the most recent one has any effect. The other powers' effects remain on the target and their durations expire as normal, but those effects don't apply. However, when the most recent effect ends, the next most recent one that is still active applies to the target. If the target dies, polymorph effects end on it immediately.

If a polymorph effect reduces a target's space, the target doesn't provoke opportunity attacks for leaving squares as it shrinks. If a polymorph effect makes a target too large to fit in the available space, the effect fails against the target, but the target is stunned (save ends).

psychic [keyword]: A damage type.

radiant [keyword]: A damage type.

reliable [keyword]: If a creature misses every target when using a reliable power, the use of that power isn't expended.

reptile [keyword]: Reptiles are cold-blooded creatures that have scaly skin.

resist: A creature that has resistance takes less damage from a specific damage type. For example, a creature that has resist 10 fire takes 10 less damage whenever it takes fire damage.

Resistance doesn't reduce damage unless the target has resistance to each type of damage from the attack, and then only the weakest of the resistances applies. For example, a creature that has resist 10 lightning and resist 5 thunder that takes 15 lightning and thunder damage takes 10 damage because the resistance value to the combined damage types is limited by the lesser of the two resistances.

shadow [origin]: Shadow creatures are native to the Shadowfell.

shapechanger [keyword]: Shapechangers, such as doppelgangers, have the ability to alter their form, whether freely or into specific forms.

sleep [keyword]: Sleep powers knock creatures unconscious.

spider [keyword]: Spider creatures include spiders as well as creatures that have spiderlike features: eight legs, web spinning, and the like.

spider climb: A creature that can spider climb can use its climb speed to move across overhanging horizontal surfaces (such as ceilings) without making Athletics checks. See also **climb speed**.

swamp walk: A type of terrain walk. A creature that has swamp walk ignores difficult terrain that is mud or shallow water.

swarm [keyword]: A swarm is composed of multiple creatures but functions as a single creature. A swarm can occupy the same space as another creature, and an enemy can enter a swarm's space, which is

difficult terrain. A swarm cannot be pulled, pushed, or slid by melee or ranged attacks.

A swarm can squeeze through any opening large enough for even one of its constituent creatures. For example, a swarm of bats can squeeze through any opening large enough for one of the bats to squeeze through.

swim speed: A creature that has a swim speed moves through water at that speed without making Athletics checks to swim.

telepathy: A creature that has telepathy can communicate telepathically with any other creature that has a language. The other creature must be within line of effect and within a specified range. Telepathy allows for two-way communication.

teleportation [keyword]: A teleportation power transports creatures or objects instantaneously from one location to another. A creature that uses a teleportation power must have line of sight to the destination space, but neither that creature nor the target being teleported needs line of effect to that space. The destination must be a space that the target can occupy without squeezing.

The target being teleported disappears and instantaneously appears in the destination space. The movement doesn't provoke opportunity attacks and is unhindered by intervening creatures, objects, or terrain.

Being immobilized or restrained doesn't prevent a creature from teleporting. If a creature teleports away from a physical restraint, a monster's grasp, or some other immobilizing effect that is located in a specific space, the creature is no longer immobilized or restrained. Otherwise, the creature teleports but is still immobilized or restrained when it reaches the destination space.

threatening reach: A creature that has threatening reach can make an opportunity attack against any enemy within its reach that provokes an opportunity attack.

thunder [keyword]: A damage type.

tremorsense: A creature that has tremorsense can clearly see creatures or objects within a specified range, even if they are invisible, obscured, or outside line of effect, but they and the creature must be in contact with the ground or the same substance, such as water or a web. The creature otherwise relies on its normal vision.

truesight: A creature that has truesight can see invisible creatures and objects within a specified range as long as they are also within line of sight.

tunneling: A creature that has tunneling leaves tunnels behind it as it burrows. The creature, as well as smaller creatures, can move through these tunnels without any reduction in speed. Creatures of the same size as the tunneling creature must squeeze

through these tunnels, and larger creatures cannot move through them at all. See also **burrow speed**.

undead [keyword]: Undead are not living creatures, so effects that specifically target living creatures do not work against them. They don't need to breathe or sleep.

variable resistance: A creature that has variable resistance can activate it a specified number of times per encounter as a free action. When the creature activates variable resistance, it chooses a damage type: acid, cold, fire, lightning, or thunder. (The creature can't choose a damage type to which it is vulnerable.) Until the end of the encounter, the creature gains a specified amount of resistance to that damage type. This resistance replaces any resistance the creature already had against that damage type. If a creature can activate variable resistance more than once per encounter, the creature can resist only one damage type at a time using variable resistance. See also **resist**.

vulnerable: A creature that is vulnerable to a specified damage type usually takes a specific amount of extra damage when it takes damage of that type, or it suffers a specific effect. For example, a creature that has vulnerable 10 radiant takes 10 extra radiant damage when an attack deals radiant damage to it or when it takes ongoing radiant damage.

water [keyword]: A water creature is strongly connected to the element of water.

weapon [keyword]: The weapon keyword identifies a power that is used with a weapon, which can be an unarmed strike. A monster's statistics block notes the weapons it uses. Monster attacks don't use proficiency bonuses. See also "Adding Equipment," *Dungeon Master's Guide*, page 174.

zone [keyword]: A zone power creates a zone, a magical area that lasts for a round or more. A zone is formed by an area of effect and fills each square in the area that is within line of effect of the origin square. A zone is unaffected by the environment, cannot be attacked or physically affected, and ends immediately when its creator dies.

If the power that creates a zone includes the ability to move it, the zone is considered a movable zone. A movable zone ends at the end of its creator's turn if the creator is not within range of at least 1 square of it (using the power's range) or if the creator doesn't have line of effect to at least 1 square of it. A zone can't be moved through a solid obstacle.

If zones overlap and impose penalties to the same roll or game statistic, a creature affected by the overlapping zones is subject to the worst penalty; the penalties are not cumulative. Similarly, a creature in the overlapping area takes damage only from the zone that deals the most damage, regardless of damage type.

RACIAL TRAITS

As in the *Monster Manual*, a few of the monsters in *Monster Manual 2* have racial traits and powers similar to those of the races presented in the *Player's Handbook* and *Player's Handbook 2*.

These traits and powers are most useful to Dungeon Masters interested in creating detailed non-player characters (NPCs). The information can also be used as guidelines for creating player character (PC) versions of these creatures. Be aware that the traits and powers that follow are more in line with monster powers than with player character powers—actual PC versions of any of the races published later would likely be slightly different.

As a DM, you should carefully consider which, if any, of the monster races you wish to include as PC options in your campaign.

Do You HEAR SOMETHING?

Brave adventurers scour the dungeon in search of treasure, but around the next dark corner something terrible and hungry waits for them. What will it be this time?

This DUNGEONS & DRAGONS® core rulebook contains a horde of monsters to unleash upon your campaign world and its greatest heroes. It includes monsters appropriate for all levels of play. Terrorize your players with such classic creatures as silver dragons, frost giants, and rust monsters. Threaten them with new variants of existing 4th Edition monsters, including new beholders, demons, and lycanthropes. Surprise them with never-before-seen monsters such as the star spawn, the witherling, and the chaos shard. Your D&D® game will never be the same!

For use with these 4th Edition DUNGEONS & DRAGONS core products:
