**Notes and Errata for KEO4-05**

- There is a great deal of confusion about Lady Hannah's age. In the Linth Primer, she is supposedly born in 576 CY. This was a typo. She was born in 586 CY. At the time this adventure takes place, Hannah is <u>eight years old</u>, not sixteen as mentioned in the module.

- The *Nethernight* cannot be taken, controlled or otherwise affected by the PCs. If seized by a PC, it appears around the neck of Lucius Linth (or Hannah, if he is dead). Furthermore, the *Nethernight's* corrupting influence causes everyone *except* Averyn Linth to generate a moderate aura of evil for purposes of *detect magic* spell. Only Averyn will detect as good for the *detect good* spell.
