

Gem Shield

6th level transmutation

Casting Time: 1 action

Range: Self

Components: V, S, M (a gem worth at least 500 gp, consumed in casting)

Duration: 1 minute

A 10ft. diameter crystallized shield appears in front of you (color determined by the type of gem) and provides you with resistance to a certain type of elemental damage (dependent on the gem used).

By channeling arcane energy through the chosen gem, the crystallized shield stands between you and any hostiles. The gem has a 60ft. fly speed and you may use your bonus action to move the shield to guard another creature.

As an action you can use the shield to target another creature. Make a ranged spell attack. On a hit the creature suffers 5d8 damage (based on the type of gem).

You can extend the duration of the spell by using a more valuable gem. Duration increased by 1 minute for every 500 gp above the original price. The shield can be dispelled.

Ruby – Fire

Sapphire – Cold

Emerald – Acid

Aquamarine – Lightning

Diamond – Psychic

Citrine – Thunder

Jade – Poison
