About the Cover

I wanted the cover for this book to be special, and at the same time, wanted to pay tribute to the classic D&D books. This was about monsters so I looked at the classic Monster Manual covers. Nothing jumped at me until I saw the classic Players Handbook cover by David Trampier. I thought, what if the devil statue was actually a golem? So I commissioned Sandy Gonzaga as usual and asked him, if that statue is a golem and it is about to come alive to deal with the interlopers, what would it look like 5 seconds later? The result is what you see.

About this Book (v1.01)

DM Options: Monster Talents is the third book about the Talents concept. The first two books (Character Options: Talents and Character Options: Talents II) have been successful and made a huge impact to a lot of players' gaming experience. However, it did have balance issues that a DM had to address. And this book will finally help the DM do that. This time, the talents are not for the players (well, most of it, see Chapter 3). This time, it's the DM who gets to have the fun choosing and playing around with feat-like options for monsters.

This book covers the creatures from the Monster Manual book, providing several talents to choose from for each critter, depending on their CR. The higher the creature's CR, the more talents they can have and the bigger their selection. As a result, you'll have plenty of options to make the tired and typical encounters your players have gone accustomed to dealing with suddenly fresh and exciting. With talents like the Stirge's insidious *Anesthetic Bite*, the Beholder's obnoxious *Redirect Central Eye*, the Balor's destructive *Meteor Strike*, the Tarrasque's terrifying *Disintegration Breath*, and the truly horrifying rage-quit inducing *Potent Antennae* of the Rust Monster to arm your monsters with, you'll have a delightful time tormenting and shocking your players.

If you didn't purchase the Character Options: Talents books, don't fret. This book can still provide you with ideas on how to create or customize your monsters. With over 140 pages of talents, you'll find a lot you can use here! Enjoy!

Introduction

What are Monster Talents?

Monster Talents are extraordinary aspects of a creature's abilities, background, personality, physique, proficiencies, and features. They offer a means for you to improve a creature's current existing abilities or provide it with new capabilities.

With the introduction of Monster Talents, your players will seldom face the same monster again.

Types of Talents

Unlike the talents presented in the Character Options: Talents books, there are only four types of talents here, each categorized on how they are supposed to be used. They are Traits, Actions, Reactions, and Legendary Actions.

Traits. The most common talent type. They are often characterized as a passive talent, such as improvements to existing abilities, added resistances, or new ongoing effects like auras. Others are features like innate spellcasting abilities, options that require it to take a bonus action, or even grant a monster Legendary Actions!

Action. A talent that provides the creature with the use of an action, such as a breath attack or spell like ability. Some actions can be used each turn while others have charges or limits per day.

Reaction. A talent that provides the creature with the use of a reaction.

Legendary Action. A talent that provides the creature with the use of a legendary action.

Legendary actions will always come with a cost.

The Monster Talents

Talent Descriptions

Below is the format for talent descriptions:

Monster Name

The name of the monster followed by its CR and the number of talents it can have. A list of talents available to that monster will be shown below it.

Type: The talent type (Trait, Action, Reaction, or Legendary Action).

Talent Cost: The count value of the talent. If this entry is absent, it means the talent counts as 1 talent. Otherwise, some talents have a cost of 2 or 3. This means they count as 2 or 3 talents if you take it. For example, the aboleth can have 4 talents. If it acquires the talent *Innate Spellcaster (Psionics)*, which costs 2 talents, this means the aboleth can only have 2 more talents. If it acquires *Slime Sphere*, which also costs 2, then it would end up with only those 2 talents.

Prerequisite: This could be a monster type, a certain feature or ability, another talent or talents. This entry is absent if a talent has no prerequisite.

How many Talents does it have?

The number of talents a creature has is equal to **one third the creature's CR plus one**, rounded down. Consult the table below for exact details:

Flyby

Type: Trait.

The aarakocra doesn't provoke an opportunity attack when it flies out of an enemy's reach.

Improved Dive Attack

Type: Trait.

If the aarakocra is flying and dives at least 30 feet straight toward a target and then hits it with a melee weapon attack, the target takes an extra 3 (1d6) damage and must succeed on a DC 10 Strength saving throw or be knocked prone.

Multiattack

Type: Trait.

The aarakocra makes two attacks: one with its javelin and one with its talon.

Aboleth

The aboleth (CR 10) can have 4 talents.

Talent Cost: 2 (Counts as 2 Talents).

The aboleth's innate spellcasting ability is Intelligence (DC 16). It can innately cast the following spells requiring no material components:

2/day (each): *hallucinatory terrain*, *major image*
1/day: *project image*

Slime Orb

Type: Legendary Action.

Slime Orb. *Ranged Spell Attack:* +9 to hit, range 120ft., one target. *Hit:* 14 (4d6) acid damage and the target must make a DC 14 Strength saving throw or be restrained until the end of the aboleth's next turn.

Slime Sphere

Type: Legendary Action (Costs 2 Actions).

Slime Sphere. The aboleth conjures a ball of acidic slime that explodes at a point it can see within 120 feet of it. Each creature in a 20-foot-radius sphere centered on that point must make a DC 14 Strength saving throw. On a failed save, the target takes 14 (4d6) acid damage and is restrained, or half as much damage and isn't restrained on a successful one. A restrained creature takes 10 (3d6) acid damage at the start of each of the Aboleth's turns.

A restrained creature can use an action to perform a DC 14 Strength (Athletics) or Dexterity (Acrobatics) check, ending the effect on itself on a success.

Tail Bash

If the aboleth's tail attack roll against a target succeeds by 5 or more, the target must make a DC 14 Constitution saving throw or be stunned until the end of the aboleth's next turn.

If the angel makes a successful saving throw against a spell, or a spell attack misses it, the angel can use its reaction to choose another creature (including the spellcaster) it can see within 30 feet of it. If the spell was an attack, the attack roll is rerolled against the chosen creature.

A creature takes 11 (2d10) bludgeoning damage and is knocked prone on a failed save, or half as much damage and isn't knocked prone on a successful one. A deafened creature automatically succeeds on the save.

Vampiric Bite

Type: Trait.

A creature hit by the shadow dragon's bite attack must make a Constitution saving throw. The DC is equal to 8 plus the dracolich's Constitution

modifier plus its proficiency bonus (see MM page 8). Failure means the target's hit point maximum is reduced by an amount equal to the necrotic damage taken, and the shadow dragon regains hit points equal to that amount.
