## The Adventure Collection, Vol. I

First, I'd like to thank you for purchasing the collection of my 2016 adventures and supplements. I hope you enjoy them as much as I enjoyed creating them. If you would like to help me promote the product, please take a moment and leave either a rating or review – or both!

A little about the adventures:

*The House of the Midnight Violet* and *The Throne of Bone* are my first published adventures. I really like both the adventures but I wish I had written them later in my adventure writing career. I feel that my adventure writing and design skills have really developed over the past six months. I apologize for any errors or clunky writing.

*The Night of the Rise* and *Screams at Sunset* are my most recent publications. I feel both of those adventures turned out very well. *The Night of the Rise* is very fun! I've play-tested it myself twice with very positive results.

If you were to string these adventures into a campaign, I suggest the below order:

- Blood on the Trail
- Bale's Outfitting Outpost
- The Night of the Rise
- Screams at Sunset
- The House of the Midnight Violet
- The Secret of Karnov Mansion
- The Throne of Bone
- Gateway to a Savage Land

You could change the order up a bit if you like. I've added the suggested party level to each of the PDF titles when you download them. And, if you do run them all together, add in the 'pieces of the key' hook found in *The Throne of Bone*. My group loved finding pieces of a key that ended up opening a magical door.

If you have any questions, please don't hesitate to contact me at [jcstevens@centurylink.net](mailto:jcstevens@centurylink.net). I'd be happy to answer any questions that you might have.

And don't forget – your ratings/reviews/feedback/shout-outs help tremendously! I'll take all the publicity that I can get!

Now – go play D&D!

Jeff C. Stevens
